TREE REMOVAL PERMISSION / REPLANTING INFORMATION

You were given permission to remove _____ trees, for which replanting of an equal number of trees is required. According to the following applicable portions of SEPOA Rules, Regulations and Covenants – Revised 2010, Pages 22 & 23, No. 19:

A. A fail-safe option for approval of removal of trees by property owner may be completed under the review by the Tree Committee by the following procedure:

Upon notifying the Board, and a completion of a review by the Tree Committee, a property owner may remove a tree that is not a threat to real property, providing the property owner replaces each tree removed from his/her property with a new tree to be planted anywhere on his/her property with a new tree to be planted anywhere on the property within 30 days. If approval to remove tree is given during the winter months of November through March, a property owner must replant no later than May 15.

B. It will be the responsibility of the property owner to replace ANY live tree removed from his property, whether a threat to real property, or not, if the tree being removed has a circumference of 5 inches or more when measured 4 feet from the ground. Such replacement to be completed within 30 days, except when approval is given during the winter months, as explained above.

C. The newly replaced tree(s) when measured 4 feet from the top of the root ball shall have a minimum circumference of 5 inches.

D. All replaced trees must survive a minimum of 12 months, or must be replaced as specified above.

E. All work must be inspected by the Association after planting.

Please notify the office when the trees have been removed and then replant as is required and specified above.

Sincerely,

Allan Seaman, Chairman
SEPOA Tree Committee
