RV 286 Overhead loader releases a barrel automatically as wagon passes underneath

RV 282 YELLOW SHUNTER

Bright Yellow Shunter loco, big load tipperwagon and big load open wagon with 15 feet (4.57 metres) of track and two 'boomerang' switches. An ideal starter set for a goods siding set-up. The wagons are tough and can even be washed when the loads are on the muddy side!

RV 285 New level crossing to add to the fun.

RV 281 RED PUFFER

Red Puffer loco, huge eight wheel gondola wagon and big passenger coach, with 15 feet (4.57 metres) of track and two 'boomerang' switches. A complete branch line train for mixed goods and passenger traffic. The carriage doors open and the gondola truck holds a really big load of anything from soldiers to sand.

NO WIRES- JUST BATTERIES

The Blue Flier requires four HP U2 or Berec equivalent batteries. The Yellow Shunter and the Red Puffer require four HP U11, U11 or Berec equivalent. No wiring and no main connections. No train set could be simpler or safer.

RV 280 BLUE FLIER

Big Blue Flier loco plus two big passenger coaches and 21 feet (6.30 metres) of track. Plus two 'boomerang' switches. The doors of the coaches open and every detail is accurately modelled from the real thing. A complete express service from your living room out into the garden!
