Mission and Goals

We intend to plant a congregation in Eight Mile Rock Grand Bahama and work diligently to nurture the Christians there so that they will be fully self-supported in approximately ten years time. Our focus is young families and young men. There is an extreme break-down of the family system in the Bahamas. Single-mothers represent most family groups and young men are often laid back, lost and live without purpose. There is a great need for God in the home and in the men of the country. By bringing the gospel to these souls, God will be glorified and the church will grow. This current social environment is the heart of the following detailed plan. Upon arriving home in February, 2018 my plans and strategies are as follows:

Phase I

Start a new Congregation

1. I will work with the local congregation for not more than 3 months while conducting Bible studies. Out of the new converts we will plant the local congregation in Eight Mile Rock..
 - a. The community where we reside is the largest settlement in the country.
 - b. Community Population - approximately 20,000
2. Children in the neighborhood- parents happily allow children to attend services. We will teach them in a way that will engage their parents.
3. Teens- parents also allow teenagers to get involved in youth groups so we will form a Community Building Youth group to engage these young people by teaching them life skills while planting the gospel seed.
4. Family and Friends- although lost in denominationalism, most of our family members and friends are religious and attend a worship service of some denomination. We will strategically request a Bible Study from each of them throughout our first year.
5. And others- We intend to request Bible Studies of acquaintances through an ad-campaign on facebook. Asking thought-provoking questions like "Tired of the Gospel of Prosperity? Let's Just Study the BIBLE . Call (242)-XXX-XXXX".

Phase II

We have begun to formulate a plan for an island-wide door knocking campaign.
