*Ultra Omega 1000 with D3, K1 and K2 is a novel fish oil product containing high potency omega-3s oils along with the enhanced benefit of the fat-soluble vitamins D and K. The enzyme lipase is included to support digestion and absorption.**

All Adaptogen Research Formulas Meet or Exceed cGMP Quality

Discussion

Omega-3s for General Health Omega-3 fats are essential to maintain optimal health, but because of industrialized farming practices and modern food processing technology, the American diet is very low in these important fats. The best sources of omega-3 fats are cold water fish like salmon, sardines, and mackerel. Since most people do not consume cold water fish regularly, supplementation is highly beneficial to help support cardiovascular, immune, and mental health, lubricated joints, and hydrated skin and hair.*

Ultra Omega 1000 with D3, K1 and K2 contains:

- **Omega-3 fatty acids EPA & DHA:**
 - **EPA (Eicosapentaenoic acid)** – Beneficial for supporting a healthy:-
 - Brain
 - Stable emotions
 - Skin Health
 - Maintaining Normal Cholesterol Levels
 - Balanced Immune Response*
 - **DHA (Docosahexaenoic acid)** – supports
 - Proper Brain Development and Function
 - Visual Acuity
 - Maintenance of Normal Lipid Levels and Blood Pressure
 - Eye Development
 - A healthy Pregnancy in Expectant Moms*

Fish Oils in the triglyceride (TG) form —the same way they naturally occur in fish.

Most mass-marketed and lower-priced fish oil supplements come in the ethyl ester (EE) form. These are less expensive and more convenient to produce, but they are not as readily recognized, digested, and assimilated as the TG form. This **TruTG™** advantage is especially effective at promoting healthy omega-3 levels in the body.

Mixed Tocopherols, which protect these fragile oils from oxidation and rancidity.

Additionally, these fish oils are molecularly distilled and filtered to ensure purity and to maximize

Many of the health benefits of omega-3 fats can be **enhanced with vitamins D3, K1 and K2** – vitamins which target the same systems as omega-3 fats. Many individuals are lacking these vitamins, so adding them to fish oil would ensure they are being supplied and utilized.
