

## Guidelines for NOVATTC

- When you intend to play at a table, please wait in line by placing your paddle underneath the table
- Players on the occupied table need to start the game within 5 minutes whenever they see paddle placed underneath the table
- The player who wins the current match can stay at the table. The player who loses must wait in line or move on to a different table to allow others to play. The player winning 3 consecutive matches must step down.
- To protect the safety of the players and their family members, please be careful of slipping and bumping into others to avoid potential injuries.
- Because the pandemic is not over, we recommend players to wear a mask when not playing

The club appreciates the participation and stewardship of all the members and visitors. Please abide by these guidelines to play safely.

Thanks for your cooperation.
