

BRM(TBC)

Dual String 120V Battery System

370AH Redundant support for critical sites, remote locations, mines and switchgear applications

Features

- ♦ With optional Rail brackets, the charger can be installed on top of the rack.
- ♦ With ABB Power plants, we can contain and breaker both the AC coming in and the DC going out in a single footprint.
- ♦ Battery options include our preferred products from GS Yusa and Fiamm, but most manufactures' products in this category will fit these systems.
