

# THE YEAR OF JUBILEE

## THE LIBERATION OF JERUSALEM AS THE FOCAL POINT

Since 70 AD, Old Jerusalem had not been under Jewish sovereignty until 1967. IF the liberation of Jerusalem on June 7, 1967 is the key pivotal point in modern history related to Biblical eschatology and the End Times, then one can count from this date the Jubilee cycles and possibly ascertain the last Jubilee within the 50 and 70 year span of a Biblical generation. This pattern could very well herald the conclusion of Daniel's Last Week of the 7 Weeks of Years from 1966. The timeline seeks only to illustrate that the '48' years from 1967 gives calculates to the year 2015. Perhaps this year is when the Jubilee will be proclaimed as the 3rd Temple is either begun or complete soon there after. This illustration does NOT allude or project that Jesus Christ's 2nd Coming has to occur on a Jubilee Year nor does it necessitate the Rapture of the Christian Church as a precursor. In Leviticus, YHWH instructed the nation of Israel to count off 49 years and on the 50th Year proclaim a Jubilee where all things reverted back to the original state and/or condition. This reset was to commence once Israel entered the Promised Land. Israel did not do that and as a result, Israel was exiled into Babylon 70 years or 10 Years of 7s prophetic weeks for the Sabbaths owed since entering the Land up until that time ~490 years. Due to the difference in Jewish Calendar counts, there is dissenting views on which date is the correct count to establish a Jubilee Year; modern Gregorian dates have been nonetheless superimposed.

**A SABBATICAL CYCLE:** It is a period of 49 Years, comprised of 7 years x 7 Sabbaths of Years. **A JUBILEE:** The year following the 49th Sabbatical Cycle or 50th Year proclaimed on Yom Kippur of the previous year. For example, if 1917 was a Sabbatical Year, then 1918 would be the Jubilee Year, if 1966, then 1967 would be the Jubilee Year etc. IF the next Jubilee Year is to be on 2016 then it would be proclaimed the prior Fall in 2015 on Yom Kippur. The Jubilee Year would be proclaimed for the year 2016 and not end until the year 2017. IF from Yom Kippur 2011 which is October 8, 2011 one adds Daniel's chapter 9 (1260 day count), it would calculate to be on March 20, 2015/Nisan 1. It so happens to be also accompanied by a Total Solar Eclipse in March of 2015. Could the 2015 mark the 'beginning' of Daniel's 7th Week or somehow be signing its approach? Could the 2015 mark the 'beginning' of Daniel's 7th Week or somehow be signing its approach as the Year of Jubilee is to be proclaimed on Yom Kippur September 22, 2015 that will usher the Tribulation period? The 1948-1967-2015 time interval is in approximate phi ratio proportion.

### LINE COLORS

- | = Jubilee Year
- | = 49th Sabbatical Year
- | = 7 Year Interval

IF starting from the Capture of Jerusalem  
in 1967 making 1966 the 49th Year  
1 Jubilee thereafter = (7 counts of 7 Years = 49 YEARS)

1966 + 7 + 7 + 7 + 7 + 7 + 7 + 7 = 2015  
1973 1980 1987 1994 2001 2008 2015

**TABLE OBSERVATION:** The last digits for the Sabbatical years  
are sequential in pattern from 0-9 and repeat (0,1,2,3,4,5,6,7,8,9)

### JUBILEE TABLE OF YEARS SINCE CHRIST

Counting 49 Year intervals backward and forwards from Bench-Mark Year of 1967\*

x/x = Sabbatical Year / Jubilee Year numerated from 1st to 42nd

\*IF 1967 marked the Jubilee Year Liberation of Jerusalem during the 6-Day War

1. AD 6/7	8. 349/350	15. 692/693	22. 1035/1036	29. 1378/1379	36. 1721/1722
2. 55/56	9. 398/399	16. 741/742	23. 1084/1085	30. 1427/1428	37. 1770/1771
3. 104/105	10. 447/448	17. 790/791	24. 1133/1134	31. 1476/1477	38. 1819/1820
4. 153/154	11. 496/497	18. 839/840	25. 1182/1183	32. 1525/1526	39. 1868/1869
5. 202/203	12. 545/546	19. 888/889	26. 1231/1232	33. 1574/1575	40. 1917/1918
6. 251/252	13. 594/595	20. 937/938	27. 1280/1281	34. 1623/1624	41. 1966/1967*
7. 300/301	14. 643/644	21. 986/987	28. 1329/1330	35. 1672/1673	42. 2015/2016
