- Cash for tips (A tip is a reward for a job well done. It is considered customary in the guiding industry as it is in the restaurant industry. Please tip on the effort of your guide, not necessarily the quality of your trophy. A tip of 10% is standard for a good job, slightly less for a satisfactory job. If you feel your guide has done a very poor job, do not tip them and discuss it with your outfitter. Please feel free to openly discuss tipping with your guide. Most guides use the best equipment they can afford at their income level. Cash is generally preferred but if you want to use an item (rifle, binoculars, clothing etc) as a tip or portion of a tip please discuss it with your guide.
