

MAGNUM SYSTEMS

Magnum Systems, through Taylor Products and Smoot brands, offers a combined 105 years of experience, application knowledge, and expertise in material handling, pneumatic conveying, and packaging systems. Magnum Systems serves a wide range of industries that process bulk materials such as grain, seeds, cereals, sugar, flour, plastic pellets, plastic powder, sand, cement, fly ash, fertilizers, and granulate chemicals and more. www.magnumsystems.com

Products Include:

- Dilute, Dense, & Eco Phase Conveying
- Rotary Airlock Feeders
- Blower Packages
- Valves and Gates
- Valve Bagging Equipment
- Open Mouth Bagging Equipment
- IBC Loading and Unloading
- Automated Packaging Equipment
- Palletizing and Container Handling
- Robotic Automation
- Components and Spare Parts

To further elaborate... **Smoot** is a leading provider of pneumatic conveying systems and components. This includes dense and dilute phase pneumatic conveying systems, rail car and truck unloading, and the ability to handle some of the most abrasive materials in the world.

Our engineering and service staff have the application experience and knowledge that have led to successful designs and installations across the world.

Taylor Products offers a broad range of modular packaging components engineered to perform alone or as a totally integrated packaging process system.

Our offering includes open mouth bag filling, valve bag filling, intermediate bulk loading and unloading, and other packaging equipment. With a weight range from 2 ounces to 2 tons and a material range that includes flowing granules to fragile powders, we have the experience and equipment to provide the right solution for your application.
