

Obama – Tear Down that Wall between Doctor and Patient

VACare is a Foreshadow of ObamaCare

Every day we watch as more and more atrocities unfold before our eyes shining a spotlight on the corruptness of big government. And the people are feeling the insecurity of it all. Everywhere you go there is an uneasiness and a feeling of “something is coming that ain’t good.”

As I grew up in old America we just knew that the military always moved heaven and earth to save one of their own. Even the movies said so. Then Benghazi. Where was the Commander in Chief and Secretary of State when the proverbial “3 AM” call came through? They aren’t saying. Now we hear that those who were there have been made to sign off on their knowledge and not tell us what they know. Inside I believe they wanted to help and some have said that very thing. Who stopped it? Just plain scary.

Dr. Ben Carson who was the director of pediatric surgery at the Johns Hopkins Children's Center for 39 years and is now in the running according reports for President of the United States made this statement on Benghazi:

“This should not be a partisan issue, because the implications of ignoring or prevaricating about the underlying mistakes will have far-reaching consequences. The United States has diplomatic establishments throughout the world, and if they can be attacked without consequences, it greatly diminishes our influence despite any protestations to the contrary.

“When our top officials make decisions to abandon our own people because they feel the situation is hopeless, they also abandon the concept of American exceptionalism and create doubt in the minds of all future military participants about the intention of their superiors to expend maximum effort to preserve their lives when they have sacrificed everything for our nation.”

Then we watched in horror as the IRS targeted certain groups who would be receiving political donations for campaigns. The IRS efforts to slow down the ability of these groups, most all of which were conservative Tea Party type groups, worked and many were unable to receive the nonprofit designation needed to allow the donations to be tax deductible.

Carson said, “Obviously, the IRS was used in inappropriate ways, or Lois Lerner would not have pleaded the Fifth Amendment. It is more than disturbing that the president of the United States and many in his party feigned outrage when the inappropriate actions of the IRS initially were exposed but now cannot lend support to a full and unfettered investigation of activities that threaten the very liberty of the American people.”

Now we have the atrocious VA scandal which leaves patriotic citizens with their jaws dropped open in disbelief. No matter when the cancer in the VA started the motivating “bonus” system has accelerated it to the point where VA workers are hiding waiting lists and making every effort to make the end result of a ‘bonus’ justify the means they used to illegally receive the bonus. You would think that the high scale of pay and all the healthcare and retirement perks of working for the Feds would be enough. But it appears not to be to some. On our taxpayer dime to boot. This VA scandal left our veterans waiting for weeks and months to receive needed medical care resulting in some veterans dying from lack of care.

According to Carson this could be a preview of the effects of ObamaCare once it is fully implemented.

"I don't see how it wouldn't be," Carson said, "It's the same precursor. Why wouldn't you have the same result?"

Carson says the multiple layers of bureaucracy between physicians and patients in the VA scandal is just what should be expected in ObamaCare. It is the same bureaucracy.

"A patient, a healthcare provider: That's all you need," said Carson. "Along comes the middleman to facilitate the relationship and it has become the primary entity."

Carson says that in medicine, decisions are based on what has happened in the past, facts. In government, he said, decisions are based on ideology.

So we wonder why in the world would anyone want to initiate such a system?

Carson believes it is very intentional. He quoted Vladimir Lenin, one of the fathers of Socialism and Communism, in his speech at the Value Voters Summit in Washington.

According to Carson, Lenin said, "Socialized medicine is the keystone to the establishment of a social state."

Carson says this is why the Obama administration did not mind that the country was in a difficult economic situation when he stepped in because the whole purpose was to organize and implement Obamacare to bring about the ability to control the country.

When asked about why he would bring such a thing up, Carson said, "If you know anything about history, why wouldn't you bring it up?"

"I have to tell you, you know Obamacare is really, I think, the worst thing that has happened in this nation since slavery," Carson said. "And it is slavery in a way because it is making all of us subservient to the government."

"It was never about health care, it was about control," said Carson.

Which might explain why whistleblower, Lisa Lee, who worked in the VA clinic in Fort Collins, Colorado was suspended from the department when she tried to shine a light on the problem.

She was asked to return later – on the condition of no more whistleblowing, she said. According to Lee she was suspended for refusing to "cook the books" on wait times at the facility.

Lee is a Navy reservist who is now on active duty in Hawaii. She and another VA scheduler were transferred from Fort Collins in March 2013 for refusing to hide wait times. She was transferred to Cheyenne, Wyoming, and received a pay cut.

"They had to punish us, they had to make us an example to the other (schedulers)," Lee said.

So is this the agenda for federal healthcare? If so, I am not interested.
