

DÉCOLLETÉ SPRING REGENERATION is a delicate and light tonifying serum to be applied on the neck and décolleté for a firming and hydrating effect.

From Indena, it contains:

XILOGEL®: highly characterized polysaccharide obtained from the seeds of *Tamarindus indica*, has strong hydrating properties. Film forming, endows the formulation with peculiar smooth and silky touch.

PA2 PHYTOSOME®: antioxidant, firming, improves the architecture of the connective tissue. It is a pure molecule obtained from horse chestnut, here in the Phytosome® form for an optimized bioavailability, specifically tested for its efficacy in the neck and décolleté area.

SERICOSIDE PHYTOSOME®: from the roots of *Terminalia sericea*, a pure molecule, sericoside, in the more bioavailable Phytosome® form provides the connective tissue a more dense architecture due to collagen synthesis improvement. In this formulation it provides a firming and redensifying effect.

PHASE	INGREDIENTS	% WEIGHT
A	AQUA (WATER)	62.650
	XILOGEL®	1.000
	IMIDAZOLIDINYL UREA	0.300
	DISODIUM EDTA	0.100
A'	AQUA (WATER)	10.000
	GLYCERIN	4.000
	PA2 PHYTOSOME®	0.500
	SERICOSIDE PHYTOSOME®	0.500
B	POLYSORBATE 20	1.000
	PHENOXYETHANOL	0.800
C	SODIUM POLYACRYLATE/DIMETHICONE/CYCLOPENTASILOXANE/ TRIDECETH-6/PEG/PPG 18/18 DIMETHICONE	4.000
D	OCTYLDODECYL STEAROYL STEARATE	15.000
E	PARFUM (FRAGRANCE)	0.150

MANUFACTURING PROCEDURE

Predisperse Xilogel® at 40°C in water under stirring for 30 minutes.
 Add the remaining components of phase A) and heat up to 75 °C.
 Weigh phase A'), heat up to 75°C and add to phase A).
 Weigh phase C) separately and add to AA') during the cooling phase at 45 °C.
 Add phase D) under stirring and homomixer during the cooling phase at 45 °C.
 Add perfume and keep cooling down.
