Subject: EIPC Target 1 Draft Report-Enable Midstream Information

The Enable Midstream Interstate Pipelines are in receipt of the subject report and in the process of reviewing the information. Joan Dreskin of INGAA asked us to provide any corrections directly to you.

In Table 5, Page 23 of the subject report, the following generators connected to Enable Gas Transmission, LLC were omitted: Dell (679 MWs), Hamilton Moses (134 MWs), Lynch (175 MWs), Couch (123 MWs), Ritchie (860 MWs) and Hot Spring (630 MWs) .

Subject: RE: EIPC Target 1 Draft Report-Enable Midstream Information

A few more corrections with regard to Enable Mississippi River Transmission(MRT):

Page 23:

MRT serves Trigen St. Louis(28MW) and the Dynegy Wood River Plant (446 MW)

Page 54:

Laclede Gas does not serve Trigen St. Louis

Page 112

Need to add that Ameren Missouri holds 30,000 Dth of Rate Schedule FTS service to the Venice plant on MRT
