

Couldn't imagine how, 5 years of life in vietnam would have been without this passionate game of cricket.

I really had to thank my family members who supported / encouraged & my brother (ISCSian) who brought me here and helped me mingle with this passionate team of ISCS (which is more than a team). Being Indian, cricket has become a part of our life from our childhood days. At this moment, It's good to look back the memories how cricket entered into my life (playing in the streets / inside a compound with rubber ball where the branches of trees/ sticks being bats and stumps).

And then a big thanks to the Vietnam cricket association which has developed tremendously and improving quality of cricket every year , sponsors and fellow members who has been supporting throughout.

Other than having the hunger / thirst for wickets or runs on the field, we've never been in thirst or hunger as the sponsors never left us so (Pepsi,Babas, etc.) Stomach full of thank you for that :)

Being ISCS ian I am personally having a good learning experience other than in the game of cricket.

Though I have lot of special names to mention who helped me improve myself, I am happy to put that in a word "ISCS' (which includes many playing/ non playing ISCS ians).

We are not just a team of good players, we are players who are associated with a good team. A good team always doesn't need a good captain, so me being one, really proud to represent "ISCS'.

We will be competing to lead the league as always.
"Jai ho.."
