Sit back and relax

We got your back

Madar Tech Co. Vehicle Tracking Services

... in Real-Time

Who we are:

Madar VTS is an Omani company with international expertise, its one of the few companies licensed by all competent bodies such as the Telecommunications Regulatory Authority to provide Vehicle Tracking Services. We depend on the highest levels of global technological advances, Madar is managed by a highly qualified and experienced team, and our goal is to provide solutions according to our customer needs.

How does it work?

- Step1:* Location of the vehicle is received by the device from the GPS Satellites.
Step2: The device sends the location information through GPRS to Madar website
Step3: Madar site acquires vehicle's location on the map in real-time.
Step4: The fleet manager views the vehicle on the map & gets vehicle status.

Benefits:

- Safety Considerations
- Accident analysis
- Generates reports
- Facilitates the decision making process
- Commercial Benefits
