

## **Cost and Support for SABER**

There is no payment made to SABER for participating. You may incur costs for the connector to SABER, but many of those are available at no cost. Using the Google Earth® and the ESRI ArcGIS Online® applications, and some other mapping applications, you may incur from no cost to little cost. XchangeCore Web Service Data Orchestration is now operated by a non-profit and provided for government use at no cost under license from the Department of Homeland Security. SABER's use of XchangeCore falls into the no cost category. The Organizing Committee members volunteer their time to SABER.
