

# SKYLINE FOOTBALL BOOSTERS

## Program Artwork Information

All logos must be in a minimum 300dpi for all images. Artwork will be submitted in PDF, photos in JPEG and content in a word doc.

## Banner Artwork Information

To use a logo, the best image would be created by a graphics professional from solid lines and colors (specifically called 'vector art'), EPS is the best choice. By using an EPS file in your design, you can retain the sharp lines in your original image, even if the file size you use is very small. If you do not have access to an EPS file, the GIF or PNG file formats will provide you with the next best print quality. Try to find the highest quality image with a file size less than 12 Megabytes (12MB).

We will design the banner through our supplier's website and email a proof for your approval. The proof should be ready for review within 48 hours of initial design submission.

What information would you like on your banner?

What font color would you like for your name and business information?

Circle the sample below you would like your banner to most resemble. (The white background is most legible)
