

**FOR IMMEDIATE RELEASE**

February 4, 2018

Tensioning Solutions Banner Stretching frames give sign professionals the flexibility to design, fabricate and install small to large frames (> 5,000 Sq. Ft.) for interior and exterior graphics using banner material. A new product, The TS2985, was designed to allow stretching any textiles without capital investment or dedicated personnel. Our Banner Stretching frames allows displaying graphics made of different materials such as printed vinyl (plain or mesh), fabric, canvas, poplin, polyester and even DuPont™ Tyvek®.

Tampa, FL - Tensioning Solutions announces the launch of the new TS2985. This product is an association of two products.

An aluminum SEG extrusion (TS29SEG) with a NEW PVC extrusion (TS85) designed to grip the textile and stretch it.

It is designed for small to medium rigid frames (Maximum size 11' x 11') destined to be hung (Wall or ceiling) and for wall-mounted mid-size and large interior frames for stretched textiles without size limitations.

Our Textile Stretching frames allows displaying graphics made of different materials such as printed vinyl (plain or mesh), fabric, canvas, poplin, polyester and DuPont™ Tyvek®.

This textile stretching frame is ideal for numerous applications (Interior only):

<ul style="list-style-type: none"> <li>• Architectural frames (any sizes)</li> <li>• Stores and malls decoration</li> <li>• Building or company halls and lobbies</li> <li>• Supermarkets</li> <li>• Exhibition booths / Banners</li> </ul>	<ul style="list-style-type: none"> <li>• Museums / Exhibits</li> <li>• Indoor Billboards</li> <li>• Lobbies, Hallways</li> <li>• Board rooms</li> <li>• and more... (See our web site)</li> </ul>
