

March 18, 2022 – COVID Update

Good afternoon from Midway Nursing Home!

We continue to closely monitor our residents for any signs/symptoms of COVID per the recently updated CMS, NYSDOH & CDC guidelines and continue ongoing testing.

There is one new resident COVID positive case. The resident has no symptoms, remains stable, and is on isolation precautions.

All staff and residents continue to be tested at least weekly until there are no new cases found for either staff or residents.

The community transmission rate for COVID-19 in Queens is moderate. Regardless of your vaccination status all should remain vigilant by wearing a tight-fitting surgical mask, sanitizing your hands frequently and maintaining distance from others. Continued screening & test requirements of all visitors remains in place.

If you or your loved one has not yet been vaccinated or received a COVID booster, we strongly urge you to do it now. This is best protection from serious illness, hospitalization, and death.

Let's continue to do all that we can to protect ourselves and others!

Stay Safe!
