The Training Response Network (TRN) Strengthens and Expands its Partnership with the Thomas & Means Law Firm

TRN's policecommunity.com is now the exclusive gateway
for all Thomas & Means on-line law enforcement training content.

HANOVER, NEW HAMPSHIRE, March 5, 2019 â€"The Training Response Network (TRN), producers of best-in-class e-training for public-safety organizations and others, today announced that it has upgraded and expanded its ongoing partnership with the highly-regarded law firm of Thomas & Means, specialists in law enforcement policy, training, and risk management.

Under the expanded partnership between the two firms, the TRN website, www.Policecommunity.com, will now serve as the exclusive cloud-based and mobile distribution platform for all Thomas & Means training in combination with its current course content.

According to TRN President & CEO Brad Naples, "This newly expanded agreement makes an already successful partnership even better. Thomas & Means pioneered law enforcement risk management and the two founding partners have 80 years of combined experience. Thomas & Means helped usher in a new era in law enforcement risk management, professional accountability and related leadership initiatives. They have seen it, dealt with it, understood it, examined it and fixed it. When law enforcement leaders want clarity, precision and specialized insight, for 30 years they have reached out to Thomas & Means."

Randy Means heads the Thomas & Means training team and will lead the creation of new content for TRN. He has long been a key part of the training courses produced by the Training Response Network and has served since its inception as its Director of Curriculum Development and Quality Assurance.

The updated and enhanced partnership calls for Means and his 50+ member national team of subject matter experts to assist TRN in creating a new and ongoing series of online courses that will be available exclusively on the policecommunity.com portal. This new content development and distribution agreement will ensure that all content produced by Thomas & Means delivers national best practices for each subject which will be viewable by the broadest possible audience of law enforcement professionals through the policecommunity.com portal and mobile app.

According to Means, â€œI have worked full-time with American law enforcement on a national basis for 40 years. I believe without a doubt that Policecommunity.com is the best cloud-based law enforcement training portal in the country based upon its quality, breadth of training, its delivery and customer support. Tens of thousands of law enforcement professionals have relied on TRN and policecommunity.com to prepare them for the ever-greater challenges of todayâ€™s law enforcement. Now they can continue to do so in the future.â€•

The TRN www.policecommunity.com website provides more than just e-training; it also provides many advanced technology applications. â€œRoll Call,â€• for example, is a pioneering software application for law enforcement and corrections that provides an easy way to set-up and send to officersâ€™ PC or mobile devices short "Twitter-like" videos of either general or agency-specific policy content. The platform also offers an easy-to-use document management delivery system, which allows an agency to easily and seamlessly upload policies, general orders and/or communication notices which then appear on an officerâ€™s in-vehicle mobile data terminal, their mobile device or their desktop PC.

TRN's native mobile app, available at either Apple App Store or Google Play Store, is an integrated software application that connects all training content, certificates of completion,

agency policies, general orders and more from the company's cloud-based Learning Management System (LMS) to any officer's desktop, smartphone, tablet or in-vehicle PC system. All end-user interaction with the TRN platform is accurately tracked via its administrative officer tracking report system and in conjunction matched to its unique and proprietary software applications. TRN offers a comprehensive range of law enforcement online training courses such as The Opioid/Fentanyl Epidemic, High Risk Felony Stops, Proper Use of Social Networking for Law Enforcement, Applied Ethics, Cultural Diversity, Human Trafficking Awareness & much more.

About the Thomas & Means Law Firm and its Team

The Thomas & Means Law Firm specializes entirely in police operations and administration and assists a broad national clientele which includes some of the largest, best and most-challenged law enforcement agencies in America. Its partners and their team have trained, advised and provided consulting services to law enforcement administrators, supervisors, criminal investigators and line-level officers since 1979. Since the early 1990s, its work has included development of computer-based training for law enforcement. The Thomas & Means training and consulting team consists of 50+ law enforcement veterans with a combined 1,000+ years of relevant experience.

About the Training Response Network

The Training Response Network (TRN) is the leading developer and provider of professional law enforcement, higher-education and K-12 e-training/learning delivered via a cloud-based or mobile access to these market segments nationally. Specially for professional law enforcement and correctional agencies nationally, TRN markets its Internet-based training solution via its captive website www.policecommunity.com. TRN's www.policecommunity.com provides more than just e-training; it also provides many advanced technology applications such as its "Roll Call" feature. Roll Call is a unique software application for law enforcement and corrections providing such agencies an easy way to set-up and send to officers' PC or mobile devices short "Twitter like" videos of either general or agency-specific policy content while insuring that all user interaction is very accurately tracked and available in a full on-demand reporting system.
