We believe the performance of the BLACK WIDOW BOW will absolutely amaze you. It has a perfect combination of smooth draw, speed and stability that will prove to you why we say, "IT IS THE FINEST BOW MADE". From our seven different models you can choose the bow that is best suited to your purpose and style of shooting.

Model X99  
Walnut handle  
trimmed with  
Rosewood  
\$100.00

Model  
X99  
Rosewood  
handle  
\$112.50

The beautiful finish on Black Widow Bows is an exceptionally durable Epoxy coating. Handle sections are Black Walnut and Brazilian Rosewood. White glass is used on front and back of all models.

If you wish your name inscribed on your bow there is no charge for this service.

Handle shapes for all models are standard as shown. When requested we will also make what is called the "California" high, or straight wrist; or a semi-high wrist handle shape. Also variations in measurements of the standard handle shape if you wish.

The Wilson Brothers make only first line bows. A Black Widow Bow is not an assembly line product, when you get a Black Widow Bow you can be sure it has had the personal attention of Norman, Jack or Bob. They are Archers making bows for the Archers who appreciate the workmanship and care that goes into every Black Widow Bow. They have had many years experience in bow making and shooting. They were National Champions as far back as 1946 and were among the top group of archers at National and Regional Tournaments for many years. They know Archery, Archers and Bow Making.
