

Not Receiving Email Notifications?

DPRA periodically sends out group emails to its members informing them about DPRA news and events. We get a few emails back as rejected by some email providers in an attempt to protect their customers from SPAM. The problem is in their attempt to block SPAM they inadvertently block some legitimate emails. This started as an AOL problem but we have seen an increase with Q.Com and Yahoo.com. If your provider is blocking emails from DPRA you may be able to eliminate the problem by adding denver@dpra.info to your safe senders list **and / or** your address book.
