

# EVERGREEN:

*Abelia x grandiflora* to *Buxus sempervirens*

## Abelia

### **Abelia x grandiflora** *Glossy Abelia*

Small, glossy, semi-evergreen leaves form the backdrop for waves of small, funnel-shaped white to light pink flowers from late June through frost. Rounded, arching form is distinctive. Form and foliage make it attractive for foundation or for border plantings. Long season of bloom. Attracts butterflies. Semi-evergreen foliage. Drought-tolerant once established.

☀️ 🌿 🌳 🍷 🍷 🦋 H: 3-6' W: 3-6' Zones: 4-8

Abelia x grandiflora

## Abies

### **Abies koreana** *Korean Fir*

Slower growing and compact, this Cary Award winning plant displays soft feeling, deep green needles with two whitish bands on the lower surface and rich, violet-purple cones starting as the plant reaches the 3 to 5' range. A very interesting specimen!

☀️ 🍷 🌿 🍷 H: 15-25' W: 8-10' Zones: 4-8

Abies koreana 'Horstmann's Silberlocke'

### **Abies koreana 'Horstmann's Silberlocke'** *Horstmann's Silberlocke Korean Fir*

Sometimes it's hard to classify an evergreen as a colorful plant but this outstanding selection will certainly fit the bill. The first thing you'll notice about this variety is its upwardly curving deep green needles backed so brightly in brilliant white that the plant takes on a unique two-toned look that is more than unusual... it's stunning! Slow growing at first, 'Horstmann's Silberlocke' will pick up momentum as it ages adding up to 2' of growth per year on its way to becoming a tall, narrow specimen that will truly stop traffic. It even sports generous amounts of bright green, upright standing cones that loom above the foliage, adding to its unique look!

☀️ 🍷 🌿 🍷 H: 40-50' W: 15-20' Zones: 5-8

Berberis Worry Free® Crimson Cutie®

## Berberis

### **Berberis WorryFree® Crimson Cutie®** PPAF *Crimson Cutie® Barberry*

**NEW!** At last! A seed free version of compact Barberry that IS NOT invasive! This UConn bred selection will grace the landscape with dense, compact form and deep, purplish-red foliage that will shine. Easy to grow, colorful and deer resistant. Plants That Work.

☀️ ☀️ 🍷 🌿 🌳 🍷 H: 2-2' W: 3-4' Zones: 4-8

Plants that Work

## Buxus

### **Buxus microphylla 'Little Missy'** PP24,703 *Little Missy Boxwood*

**NEW!** Little Missy was spotted at a growing nursery in West Virginia where they noticed its exceptional form and smaller leaves. Its dark green foliage retains its color all summer and through the winter. Hardy to zone 5, Little Missy, performs well in the New England states and its compact, rounded form makes it an excellent choice for low hedges or foundation plantings. Hardy, easy to grow & deer resistant with good green color retention.

☀️ ☀️ 🍷 🌿 🍷 H: 20-24" W: 20-24" Zones: 5-8

Plants that Work

Buxus micro. Jap. 'Little Missy'

### **Buxus sempervirens** *Common Boxwood*

**NEW!** An old-fashioned favorite that still holds its own in the modern landscape and is deer resistant. Beautiful foliage and large, dense form make this plant ideal for specimen or hedging use. Excellent for use as greens in holiday flower arranging.

☀️ ☀️ 🍷 🌿 🍷 H: 8-10' W: 8-10' Zones: 5-8

## EVERGREEN:

*Buxus sempervirens* 'North Star' to *Chamaecyparis obt.* 'Templehof'

### **Buxus sempervirens North Star® North Star® Boxwood**

If low maintenance is your mantra for the landscape, this improved selection of Boxwood is the plant you need! 'North Star'™ forms a dense globe in the landscape that requires no pruning to retain its tight, almost formal presence. You won't be pruning back any dead plant parts after a cold winter either. 'North Star'™ is extremely hardy and retains its lustrous, deep green foliage color better than almost any other Boxwood you can find during the winter months. Use 'North Star'™ as a low-growing hedge or even to create the borders of a formal herb garden. It's a beautiful evergreen that will provide year round enjoyment in the landscape. Deer resistant. Prefers moist, well-drained soil. Proven Winners.

☀️ 🌞 🍷 🌿 🌱 🌳 H: 2-3' W: 2-3' Zones: 5-8

## Chamaecyparis

### **Chamaecyparis nootkatensis 'Pendula' Weeping Alaskan Cedar**

Deep green-blue foliage and a stately, weeping form make this plant an ideal specimen in the landscape. Rapid growth and low maintenance make this adaptable Cary Award winner an increasingly popular selection.

🌳 H: 15-20' W: 15-20' Zones: 5-8

### **Chamaecyparis obt. Blue Feathers Blue Feathers Hinoki Cypress**

**NEW!** A welcome addition to any small space garden, 'Blue Feathers' is a slow growing, compact, flattened globe shaped plant with an abundance of juvenile foliage giving it a feathery, fine textured look. This dense, yet frilly look is enhanced with outstanding blue foliage hues that really draw your attention, especially in full sun where this plant thrives.

🌳 H: 3-4' W: 4-5' Zones: 5-8

### **Chamaecyparis obt. Crippsii Cripps Golden Hinoki Cypress**

If you're seeking an evergreen with real presence, look no further than this selection that has so much personality, it's hard to ignore. This golden, upright, pyramidal large shrub to small tree sized plant is a vigorous grower sending out graceful horizontal branches of spreading, fan-like fronds. 'Crippsii's' coloration will make you look twice with fan-like fine-textured sprays that are tipped with brilliant yellow, gradually becoming gold then bright chartreuse as you progress from outside to in on the plant. 'Crippsii' holds its color well in winter and thrives in sun or light shade, although full sun is best to maximize its outstanding yellow coloring.

🌳 H: 10-15' W: 8-10' Zones: 5-8

### **Chamaecyparis obt. Fernspray Gold Fernspray Gold False Cypress**

You won't be able to resist this evergreen eye candy, especially given this plant's soft frond-like foliage that will remind you of a golden fern. Dense and broadly upright, 'Fernspray Gold' grows at a moderate pace, tolerating full sun or light shade while keeping its remarkable gold foliage color all year without fading in the summer heat. It's a great plant for grouping together to form a beefy golden border planting or you can showcase its great form and color as a stand alone specimen.

🌳 H: 18-24' W: 2-3' Zones: 5-8

### **Chamaecyparis obt. Gracilis Compact Hinoki Cypress**

Deep green, fan-shaped foliage and winning pyramidal form make this dependable evergreen a perfect plant for a small specimen or grouping to form a border hedge. Textured foliage gives a touchable look and this selection is easy to grow and tolerant of most half to full sun landscape spots.

🌳 H: 12-15' W: 6-8' Zones: 5-8

### **Chamaecyparis obt. Templehof Templehof Hinoki Cypress**

Another textural masterpiece! Slow, steady growth and a pleasing, globose form combined with its deep green, fan-shaped foliage make this selection a perfect choice.

🌳 H: 3-4' W: 3-4' Zones: 4-8

## EVERGREEN:

### *Chamaecyparis obtusa* 'Sunny Swirl' to *Chamaecyparis pisifera* 'Soft Serve®'

#### ***Chamaecyparis obtusa* 'Sunny Swirl'** *Sunny Swirl Hinoki Cypress*

**NEW!** 'Sunny Swirl' shines in the landscape with illuminating blends of gold and chartreuse on twisting, threadlike foliage. The upright and uniquely contorted branches of mahogany red bark on this slow growing, dwarf evergreen provide a striking contrast with its intense coloration.

 H: 6-8' W: 4-5' Zones: 5-9

#### ***Chamaecyparis obtusa* Filicoides Compacta** *Compact Fernspray Cypress*

**NEW!** This unique slow growing cultivar has a compact habit with dark green foliage arranged in appealing narrow fern-like sprays. 'Filicoides Compacta' is a pyramidal evergreen with graceful, arching limbs, and the tapering branches create a unique texture and make for an excellent garden specimen or a striking container plant.

 H: 6-8' W: 3-4' Zones: 4-8

#### ***Chamaecyparis obtusa* Nana** *Dwarf Hinoki Cypress*

This low, globe-shaped shrub bears deep green, compact sprays of horizontal branches and attractive fan-like foliage all year long. Ideal planted against a foundation, massed on a slope, in borders or containers.

 H: 2-3' W: 3-4' Zones: 4-8

#### ***Chamaecyparis p.* Vintage Gold** *Vintage Gold Cypress*

It's easy to be dazzled by the amazing color of this plant and to ignore its other great landscape attribute: its form! 'Vintage Gold' has a dense rounded form that is easy to use in any half to full sun area. When you plant it, you'll certainly notice how it will brighten up any area with its striking gold fernlike foliage that keeps its blazing color throughout the season without fading. Combine texture, form, and color and you have an outstanding dwarf conifer your customers will love!

 H: 3-5' W: 3-5' Zones: 5-8

#### ***Chamaecyparis pisifera* 'Cream Ball'** *Cream Ball Japanese Falsecypress*

Dwarf-growing conifer offers gray-green foliage with distinctive yellow-green to almost white tips. This great foliage color is enhanced by its dense, compact spreading form. Dense rounded, slow growing form is ideal in rock gardens, foundation plantings under windows, banks, slopes or large scale groundcover. Easy to grow.

 H: 12-24" W: 12-24" Zones: 4-8

#### ***Chamaecyparis pisifera* 'Filifera Aurea'** *Gold Thread Cypress*

Our selection of this popular plant is a landscape winner with a stunning, year-round yellow color that stands up to the summer sun without scalding. Combine this with its slow growth and tight habit, and it's obvious why this plant is in such demand.

 H: 3-7' W: 3-7' Zones: 4-8

#### ***Chamaecyparis pisifera* Soft Serve® PP20883** *Soft Serve® False Cypress*

You'll want nothing more than to reach out and touch this compact, conical, slow growing evergreen with its dense yet graceful foliage and soft, fernlike branching. This sport of 'Boulevard' features leaves that are bright green on top and flecked with silver-blue on the underside and, while having some of the great texture of 'Boulevard', it has none of the disease problems that can plague that selection. Soft Serve™ requires little pruning and thrives in full sun to partial shade. It prefers moist, well drained soils and some protection from the harshest of winter winds and sun for its optimum appearance. Proven Winners.

 H: 4-6' W: 4-6' Zones: 5-8

## EVERGREEN:

### *Chamaecyparis pisifera* 'True Blue' to *Ilex Crenata* 'Hoogendorn'

*Chamaecyparis thyoides* 'Top Point'

*Euonymus f.* 'Gold Splash®'

#### ***Chamaecyparis pisifera* True Blue True Blue False Cypress**

**NEW!** This dense growing pyramidal shrub provides sweet texture and foliage color as blue needles provide year round color and 'fluffy' look that is one of a kind in the garden! Dense rounded, slow growing form is ideal in rock gardens, foundation plantings under windows, banks, slopes or large scale groundcover. Easy to grow. Great foliage color and texture.

🌳 H: 3-4' W: 2-3' Zones: 4-8

#### ***Chamaecyparis thyoides* Top Point Top Point Dwarf White Cedar**

There's a lot to love about this dense, slow growing little evergreen. You have to love its form... it's so compact that it will fit in any garden, even in a formal container or foundation garden, places where native plants never seem to find a home. You'll also love its easy care nature. Nothing seems to bother this plant; wind, partial shade, moist to wet soils. 'Top Point' takes all these concerns in stride without batting an eye. It even looks great with small, deep green, very short needled foliage packed tightly enough on branches to seem almost impenetrable with an added bonus of a plum red to bronze winter color that really catches the eye. You and your garden critters will love this little gem no matter where you put it in the garden! American Beauties Native Plants®.

🌳 H: 4-5' W: 18-24" Zones: 4-8

## Cryptomeria

#### ***Cryptomeria japonica* Black Dragon Black Dragon Japanese Cedar**

Dark green needles arranged in numerous branchlets create a graceful, broadly pyramidal habit. Great little specimen tree that is sure to draw interest from everyone. Slow growth and compact habit are perfect for smaller spaces in the landscape. Perfect as a specimen.

☀️ 🌳 H: 8-10' W: 5-6' Zones: 5-9

## Cupressocyparis

#### ***Cupressocyparis x. Leylandii* Leyland Cypress**

Vigorous and upright, this fast growing evergreen has medium green foliage and is attractive for many landscape uses.

☀️ 🌳 H: 60-70' W: 20-25' Zones: 4-8

## Euonymus

#### ***Euonymus f. Gold Splash®* Gold Splash® Euonymus**

Not just another variegated Euonymus, you'll notice 'Gold Splash'™ immediately because of its strong growth, strong color, and beefy leaf size. Some Euonymus look good at the nursery and fade in the landscape but this bold beauty adds a strong constitution to its colorful attributes creating what might be the best evergreen Euonymus on the market. Its foliage seems thicker and bolder than others in this genus while the plant maintains its denseness and small stature making it perfect for small spaces and grouping in sun or partial shade. It even has a great show of yellow fruit and orange seeds for fall! Proven Winners.

☀️ 🌳 H: 2-3' W: 3-4' Zones: 5-8

## Ilex

#### ***Ilex crenata* Hoogendorn Hoogendorn Japanese Holly**

**NEW!** Easy to grow with great landscape texture. Perfect for use as a low, spreading, dense hedge along a border. Dense and spreading, this evergreen adds dependable performance to the landscape, along with great texture provided by its small, flattened, lustrous deep green foliage.

☀️ 🌳 H: 4-5' W: 5-6' Zones: 5-8

## EVERGREEN:

### *Ilex Crenata 'Soft Touch' to Juniperus hor. 'Golden Carpet'*

#### **Ilex crenata Soft Touch** *Soft Touch Compact Holly*

**NEW!** Easy to grow with great landscape texture. Perfect for use as a low, spreading, dense hedge along a border. Dense and spreading, this evergreen adds dependable performance to the landscape, along with great texture that is provided by its small, convexed, lustrous deep green foliage.

☀️ 🌿 🍷 H: 3-4' W: 5-6' Zones: 5-8

#### **Ilex glabra Gem Box®** *PP27,554 Gem Box® Inkberry holly*

**NEW!** A great alternative to boxwood! This cool new dwarf, broadleaf evergreen looks more like a boxwood than an inkberry. A dense, ball-shaped plant, Gem Box ilex has small, dainty, dark green leaves with attractive red tips during the spring flush. It maintains good branching right to the ground so it never looks bare-legged like other cultivars may. It's great as a small evergreen hedge or used as a container specimen in milder climates. Proven Winners.

☀️ 🌿 🍷 H: 24-36" W: 24-36" Zones: 5-9

#### **Ilex verticillata Southern Gentleman** *Southern Gentleman*

**NEW!** Extremely hardy holly with rich deep green foliage on an oval-rounded form. Plant as a pollinizer for Southern Winterberry varieties. This shrub does not produce berries, male plant. Use as erosion control, mass plantings, or in borders and beds.

☀️ 🌿 🍷 H: 10-15' W: 10-15' Zones: 3-9

#### **Ilex verticillata Sparkleberry** *Sparkleberry Winterberry*

**NEW!**

☀️ 🌿 🍷 H: 10-12' W: 8-12' Zones: 4-9

#### **Ilex x meserveae Castle Wall®** *USPP 14,308 Castle Wall® Blue Holly*

**NEW!** Handsome columnar holly. The Castle Ilex are compact, pyramidal varieties of blue holly. Dark glossy leaves, superior vigor and branching make them an improvement over other older varieties. Their narrow form makes them great for hedges, foundation plantings, or even as a dramatic specimen. The lustrous green foliage provides season long interest. Use Castle Wall holly as the pollinator for Castle Spire holly, or grow it on its own as a narrow hedge. This is a male variety that will not produce fruit. Proven Winners.

☀️ 🌿 🍷 H: 5-8' W: 3-4' Zones: 5-7

## Juniperus

#### **Juniperus chinensis Old Gold** *Old Gold Juniper*

Compact growth habit and rich, gold color adds to the desirability of this variety. Wider than tall and very adaptable, this is a great plant to use singly or in groups. Great foliage color year round. Easy to grow. Tolerates drought and full sun well. Perfect for grouping along a sunny border or on a slope. Good for erosion control.

☀️ H: 3-4' W: 6-7' Zones: 4-8

#### **Juniperus communis Gnom** *Gnom Juniper*

Delicately textured, gray-green foliage striped with silver makes this tough upright juniper outshine other conifers. Dense and exceptionally hardy. Stays narrow and keeps shape without flopping or sprawling open. 'Gnom' only grows about 3-4" per year making it ideal for smaller landscape spots or containers. Easy to grow and does best in full sun.

☀️ H: 10-12' W: 3-4' Zones: 2-8

#### **Juniperus horizontalis Golden Carpet** *Golden Carpet Spreading Juniper*

**NEW!** This prostrate grower puts on a spectacular show with dense, brilliant gold foliage color that lights up any area. Great winter look as gold foliage mixes with shades of mauve winter color. Easy to grow and aggressive growing compared to other prostrate yellow forms. Perfect for grouping as a groundcover. Thrives in poor, sandy soils. Great year round color. Deer resistant.

☀️ H: 3-6" W: 6-8' Zones: 3-8

## EVERGREEN:

### *Juniperus horizontalis* 'Mother Lode' to *Picea abies* 'Pendula'

*Picea abies* 'Nidiformis'

#### **Juniperus horizontalis** *Mother Lode* PP#5,948 *Mother Lode Juniper*

**NEW!** Trailing, mat forming evergreen with striking golden yellow foliage. Outstanding year-round color with foliage taking on an orange-yellow to plum winter hue. Tough, drought resistant, and reliable. Excellent as a color accent in any planting or planted in groups to become a ground cover. Attention getting, year round foliage color.

☀️ H: 4-6" W: 8-10' Zones: 3-8

*Juniperus horizontalis* 'Mother Lode'

#### **Juniperus virginiana** 'Brodie' *Brodie Eastern Red Cedar*

**NEW!** Deep green foliage fills strongly upright stems forming a tall, fine textured evergreen. This tough, hardy native has small, grayish colored berries in fall and foliage turns a burgundy color in winter. Easy to grow. Tolerant of poor, sandy soils. Drought tolerant and deer resistant. Berries attract birds. Perfect for grouping to form a border hedge. Distinctive winter color

☀️ H: 15-20' W: 6-7' Zones: 3-8

### Kalmia

#### **Kalmia lat.** *Olympic Fire* *Olympic Fire Mountain Laurel*

**NEW!** Upright, dense and rounded, this evergreen shows twisted, deep green foliage and loads of bright red flower buds that open pink in early to mid-June. Superb for naturalizing in groups as woodland edge border planting. Interesting, showy foliage and eye-turning bloom just before summer begins. Shade tolerant.

👍 👍 H: 4-5' W: 4-5' Zones: 5-8

*Juniperus virg.* 'Brodie'

### Microbiota

#### **Microbiota decussata** *Russian Cypress*

This Cary Award winning shrub earns all its accolades by being one of the best groundcover conifers available! Very hardy with a soft, feathery touchable foliage, this selection does great in sun or shade and has a striking bronze fall color.

☀️ ☀️ ☀️ 👍 🌱 🗑️ 🗑️ H: 10-12" W: 8-10' Zones: 2-8

#### **Microbiota decussata** *Celtic Pride*® *Celtic Pride*® *Siberian Cypress*

Russian Cypress is one of the hardiest plants you could ever grow tolerating temperatures down to -50 without batting an eye. Unfortunately, even with its outstanding cold hardiness, many strains of this incredibly tough groundcover tend to succumb to disease problems making them fade away in the landscape piece by piece in an ugly manner. Celtic Pride™ is the most disease resistant selections you will find allowing you far more success in the landscape. Celtic Pride™ is all about ease and success with its no prune form, its ability to perform in sun, partial sun or shade and its deep green summer color that can fill the roughest toughest, driest, most gnarly areas of the landscape with a carpet of green. In the winter its color transforms to a striking bronze shade making this easy care, drought tolerant, deer resistant beauty with the soft, feathery foliage texture one of the easiest plants you'll ever grow. Proven Winners.

☀️ ☀️ ☀️ 👍 🌱 🗑️ 🗑️ H: 12-15" W: 8-10' Zones: 2-7

*Microbiota decussata*

### Picea

#### **Picea abies** *Nidiformis* *Birds Nest Spruce*

Dependability is this plant's middle name! Slow-growing and spreading this plant tolerates sandier soils, low temperature, and should be welcome in any landscape.

☀️ H: 2-3' W: 4-5' Zones: 3-8

#### **Picea abies** *Pendula* *Weeping Norway Spruce*

Evergreen with pendulous branches that are clothed with dark green needled foliage. Needs support to keep it growing upward and weeping. Rugged, dependable and hardy. Adapts well to many sites. Perfect for focal point, center piece in beds or for entryways. Deer resistant.

☀️ H: 6-10' W: 10-12' Zones: 3-8

*Microbiota decussata* Celtic Pride®

## EVERGREEN:

### *Picea glauca* 'Conica' to *Pinus flex.* 'Vanderwolf's Pyramid'

#### ***Picea glauca* 'Conica'** Dwarf Alberta Spruce

A compact, pyramidal spruce that is very slow-growing. It is widely used in the landscape because of its low maintenance, slow growth habit and rugged dependability.

☀️ H: 6-8' W: 3-4' Zones: 3-8

#### ***Picea pungens* Baby Blue** Baby Blue Blue Spruce

Finally, a seed sourced Blue Spruce that is actually dependably blue!! That's something worth celebrating and you will once you check out this plant's pleasing blue needles that stiffly whorl around stiff, ascending branches to create an upright, pyramidal tree that is hard not to admire. 'Baby Blue' can be used as a specimen or grown together to create a stunning large hedge or windbreak. 'Baby Blue' will thrive in full sun and well-drained soil, just remember to give this big boy some room to grow then stand back and admire the color!

☀️ H: 40-50' W: 15-20' Zones: 3-8

#### ***Picea pungens* Fat Albert** Fat Albert Blue Spruce

If you love Blue Spruce, this is the Blue Spruce you are thinking about! It differs from the species because of its consistent steel blue color and its dense, tight slow growing form and it's a difference that will take you breath away! You'll be astounded by the color show it puts on and also by the much smaller footprint it holds in the landscape, a distinct advantage over the species. 'Fat Albert' loves full sun and, even though it is smaller and slower growing, it should avoid being planted too close to houses and electrical wiring.

☀️ H: 15-20' W: 8-12' Zones: 3-8

#### ***Picea pungens glauca* 'Globosa'** Globe Blue Spruce

Great color year round marries with outstanding, dense, rounded form to create the ultimate easy care small garden specimen for your landscape. 'Globosa' is a slow grower that adds merely 2 to 3" of growth yearly meaning it will be perfect for brightening up small landscape spaces for years without overpowering them. Its brilliant, electric blue needle color can't be ignored and its rounded form makes it more regular than 'Montgomery' which tends to form a leader and become a widely irregular pyramid as it matures. 'Globosa' is an easy care, sun loving plant that will give years of pleasure with little need for your input.

☀️ H: 3-4' W: 4-5' Zones: 3-8

## Pieris

#### ***Pieris jap.* 'Avalanche'** Avalanche Andromeda

There is not a Pieris you'll find that has the flower power that this selection brings to the landscape. Its dense, rounded form comes into early spring teeming with long strings of flower buds at stem terminals that open in mid-April to clouds of white flowers that barely reveal the leathery, medium green foliage below. 'Avalanche' seems to bloom forever, holding its flowers as the cool of April warms into mid-May, still looking like a cascade of white. Once its bloom does go by, its new growth stays tidy and dense making this a plant that can be used singly in a small space or one that can be used in groups without overwhelming a spot. While this selection will tolerate a sunny spot, it loves partial shade to shade, is deer resistant, and will put on an unforgettable early spring show in that location.

☀️ 🌱 🌿 🌸 🌱 H: 4-5' W: 4-5' Zones: 4-8

## Pinus

#### ***Pinus flex.* Vanderwolf's Pyramid** Vanderwolfs Pyramid Limber Pine

**NEW!** Each branch is decorated with whorls of soft, long, fragrant needles with a distinctive white strip giving the plant a silvery cast in the landscape. A stunning broad pyramid specimen. Deer resistant. Outstanding specimen that is attractive all year. Easy to grow.

☀️ 🌱 H: 35-40' W: 20-25' Zones: 4-8

## EVERGREEN:

### *Pinus mugo* 'Slowmound' to *Pinus strobus* 'Shaggy Dog'

#### **Pinus mugo Slowmound** *Slowmound Mugo Pine*

There is always some gray area when it comes to figuring the ultimate size of some Mugo Pine but you can always be sure that 'Slowmound' will be a dense, compact mound that is perfectly suited for foundation plant groupings and small space gardening. Even its needles are more compact with their 1.5 to 2" twisting length that give this easy grow, trouble free plant a tight, bristling appearance that is hard to resist.

☀️ 🌳 H: 2-3' W: 2-3' Zones: 3-8

#### **Pinus mugo Var. Mughus** *Dwarf Mugo Pine*

Texture and touchability make this durable, slow growing conifer extremely popular. Easy to grow and easy to use, both singly or in groups in the landscape.

☀️ 🌳 H: 3-4' W: 6-8' Zones: 3-8

#### **Pinus strobus 'Blue Shag'** *Blue Shag White Pine*

Straight from the work of the late Dr. Sid Waxman at the University of Connecticut comes this beautiful, compact pine that just begs you to touch and feel it every time you see it. Soft, bluish-green needles are shorter than the needles of the species and are crowded together on tightly bunched stems to create a tight, yet very soft looking rounded mound that only grows about 4" per year. 'Blue Shag' will retain its round form and become a landscape focal point, so be sure to give it enough room to spread and plant it in a sunny site with moist, well-drained soil so that you can enjoy it to its fullest.

☀️ 🌳 H: 6-8' W: 6-8' Zones: 3-8

#### **Pinus strobus Connecticut Slate** *Connecticut Slate Dwarf White Pine*

Another introduction of the late Dr. Sydney Waxman of the University of Connecticut, 'Connecticut Slate' is a dense, spreading, quicker growing Dwarf White Pine that features gray-blue colored needles that make it stand out from the many other varieties on the market currently. The medium length, slate colored needles are tightly packed along the stems giving 'Connecticut Slate' a full appearance even though it is not as tightly dwarf as other types. It's a great plant for a border area, thriving in full sun or partial shade, and it makes a beautiful specimen for a larger foundation area with color and form that is truly memorable.

☀️ 🌳 H: 5-6' W: 8-10' Zones: 3-8

#### **Pinus strobus Pendula** *Weeping Eastern White Pine*

The Weeping Eastern White Pine is a plant that will take on an individual personality depending on the kind of landscape situation in which it is placed. If you are looking for a wide, flowing specimen, this is the plant for you as it only attains the height that you train it to reach. The rest of the branches flow and cascade like a branching waterfall of curving, pendulous branches covered with soft textured, long green needles. It makes an incredible landscape focal point in a place where you can provide it room to move and shine. Weeping White Pine loves full sun and well-drained, moist soils and requires only a little staking artistry on your part to provide years of ooohs and aaahs!

☀️ 🌳 H: 10-12' W: 20-25' Zones: 3-8

#### **Pinus strobus Shaggy Dog** *Shaggy Dog Eastern White Pine*

Famous for his groundbreaking work with dwarf White Pines from witch's brooms, the late Sid Waxman from the University of Connecticut introduced this low, irregular, half-upright spreader with long needled, unruly branches in 1993. This new favorite breaks the mold of many of his dense, tight, impenetrable selections to give us a more open, highly textured plant that is more relaxed, free-form and airy. This sweet textured beauty is perfect for a large location where it can look its 'Shaggy Dog' best, anchoring any sunny, well drained location by growing into a spectacularly different, year round beautiful specimen.

☀️ 🌳 H: 5-6' W: 6-8' Zones: 3-8

## EVERGREEN:

### *Pinus strobus* 'Soft Touch' to *Thuja* 'Mr. Bowling Ball'

#### **Pinus strobus Soft Touch** *Soft Touch White Pine*

A delightful, dense, dwarf selection from the research of Dr. Sid Waxman at the University of Connecticut, 'Soft Touch' is a Cary Award recipient for good reason. Its growth habit and slow growth speed make it perfect for small space use while its short, thin, wavy needles, tightly packed on close-knit branches make you want to reach out and touch them. You'll love this plant's soft feel and great landscape look and the fact that it is so easy to grow, prospering nicely in any sunny location with moist, well-drained soil

☀️ 🌱 H: 3-4' W: 4-5' Zones: 3-8

#### **Pinus strobus Torulosa** *Twisted Needle White Pine*

White Pine is one of our area's standout native evergreen trees. 'Torulosa' puts a new twist on this old time favorite with curled, twisted needles that cover the plant and give it a different look and texture that is subtle but readily apparent in the landscape. The needles are soft and carry the same pleasing blue-green tinge that is one of White Pine's most agreeable characteristics but they corkscrew with 2 or more twists and give the tree and fuller, more fluffy look than the species. Like its regular needled parent, 'Torulosa' is a large, rapidly growing tree that performs well in full sun or partial shade so give lots of room and let your neighbors comment about this easy to grow, showy novelty.

☀️ 🌱 H: 40-50' W: 40-50' Zones: 3-8

## Prunus

#### **Prunus laurocerasus Otto Luyken** *Otto Luyken Laurel*

**NEW!** This dense, spreading evergreen shrub has glossy green, long narrow foliage that sets off clusters of small white, fragrant flowers in May. Repeat blooming sporadically through the year. Dependable and great-looking year round. Glossy foliage is striking. Fragrant spring bloom repeats during the summer. Perfect for massing on borders and good for foundation use.

🌿 🌱 H: 3-4' W: 5-6' Zones: 4-8

#### **Prunus laurocerasus Schipkaensis** *Schipka Cherry Laurel*

**NEW!** This dense, spreading evergreen shrub has glossy green, long narrow foliage that sets off clusters of small white, fragrant flowers in May followed by red fruit in summer and fall. Dependable and great looking year round. Glossy foliage is striking. Fragrant spring bloom repeats during the summer. Perfect for border grouping and for foundation use, attracts birds

🌿 🌱 H: 5-6' W: 6-8' Zones: 4-8

## Sciadopitys

#### **Sciadopitys verticillata** *Japanese Umbrella Pine*

So clean, so perfect looking your customers will think this plant's plastic!! Slow-growing when young, speedier as it ages, this pyramidal wonder's deep green, thick glossy needles will show their beauty in any landscape. Nearly pest and insect-free!

H: 20-30' W: 10-15' Zones: 5-8

## Taxus

#### **Taxus cuspidata Densiformis** *Dense Spreading Yew*

Dense growing yew, spreading much wider, especially in foundation planting. It responds well to pruning.

H: 3-5' W: 5-6' Zones: 4-8

## Thuja

#### **Thuja Mr. Bowling Ball®** *Mr. Bowling Ball® American Arborvitae*

Here's a round evergreen with some personality! 'Mr. Bowling Ball™' has the same form as that old stand by 'Hetz Midget', but with lacy, awl-like, juvenile foliage that gives it a whole new look and texture in the landscape. This frilly, globe shaped plant is dead easy to grow and a delight in a foundation planting, on a border, or in any small space that could use a great looking, tolerant plant. 'Mr. Bowling Ball™' maintains its great looks without pruning and thrives in full sun.

☀️ 🌱 H: 3-4" W: 3-4" Zones: 4-8

Pinus strobus 'Soft Touch'

Pinus strobus 'Torulosa'

Prunus laurocerasus 'Otto Luyken'

Prunus laurocerasus 'Schipkaensis'

Sciadopitys verticillata

## EVERGREEN:

### *Thuja occidentalis 'Smaragd'* to *Thuja occidentalis 'Hetz Midget'*

Thuja occidentalis 'North Pole®'

#### **Thuja occidentalis 'Smaragd'** *Emerald Green Arborvitae*

This upright, narrow grower has an irresistible, soft green foliage and a shape that lends itself to tons of landscape functions from hedging to specimen use. Adaptable and easy to grow.

☀️ 🍷 H: 18-20' W: 5-6' Zones: 3-8

Thuja occidentalis 'Smaragd'

#### **Thuja occidentalis Filip's Magic Moment** *USPP 21,974 Filip's Magic Moment Arborvitae*

**NEW!** Dwarf Alberta Spruce are extremely popular in residential landscapes - maybe too popular. Here's an easy-to-grow alternative with the same desirable size and habit, plus brighter color. It's perfect for flanking formal entryways, either in the ground or in large containers. Proven Winners.

☀️ 🍷 H: 6-8' W: 1-3' Zones: 3-7

Thuja occidentalis 'Filip's Magic Moment'

#### **Thuja occidentalis Fire Chief™** *PP19,009 Fire Chief™ Globe Arborvitae*

Nearly perfectly globe shaped evergreen has finely textured, bright golden spring foliage. Very slow growing variety with fantastic autumn colors of deep red. This selection is a worthy choice for a rock garden, as a specimen or as an accent plant. Requires little maintenance.

☀️ 🍷 H: 3-4" W: 3-4" Zones: 4-8

Thuja occidentalis 'Fire Chief'

#### **Thuja occidentalis Nigra** *Dark American Arborvitae*

There's no doubt that this is the quintessential screening plant loaded with landscape plusses. Growing quickly and possessing a narrow, upright form, 'Nigra' is covered in densely held, deep green, fan-like foliage causing little chance of seeing objects on the other side! Best of all, unlike other large evergreens, 'Nigra' has a small footprint that makes it even easier to work with. It's perfect for growing in full sun or partial shade and tolerates all but the wettest soils with little complaint.

☀️ 🍷 H: 20-30' W: 6-8' Zones: 3-8

#### **Thuja occidentalis North Pole®** *PP22174 North Pole® Arborvitae*

North Pole™ is an easy to grow evergreen that will thrive in your landscape through thick or thin. Actually, thick or thin may be the perfect analogy for this plant. Its thin form will make you sit up and take notice as it stays thinner than 'Emerald Green', one of the most popular Arborvitae sold today. While it stays thin and narrow, its tightly held, fan-like foliage covers its narrow form thickly to produce a plant that impenetrable to vision making it a wonderful hedge plant when planted en masse. Its form and ease of growth also make it a perfect single specimen plant for any narrow space in the sunny or partially sunny landscape. North Pole™, unlike other Arborvitae, is also masterful about retaining its dark, deep green foliage color even in the harshest of winters, a claim among other like Thuja that is often made but less often truly borne out. North Pole™ prefers moist, well drained soil but will be tolerant of drier soil once established. Proven Winners.

☀️ 🍷 H: 10-15' W: 3-5' Zones: 3-8

Thuja occidentalis 'Rheingold'

#### **Thuja occidentalis Rheingold** *Rheingold Arborvitae*

A landscape show stopper! Dense growing with a globular shape, this easy to grow evergreen has the added value of a seductively soft texture and an eye grabbing orange-yellow color during the growing season.

☀️ 🍷 H: 4-5" W: 3-4" Zones: 4-8

#### **Thuja occidentalis Hetz Midget** *Hetz Midget Globe Arborvitae*

**NEW!** Scale-like foliage populates fan-like foliage fronds that pack tightly to form a dense, flattened globe shaped evergreen offering great landscape texture on a slow growing plant Easy to grow. Perfect for use in smaller landscape spots or in group border plantings. Excellent landscape texture. Slow growing

☀️ 🍷 H: 3-4' W: 4-5' Zones: 4-8

## EVERGREEN:

### *Thuja plicata* '4ever Goldy' to *Thuja X* 'Green Giant'

#### **Thuja plicata 4ever Goldy** *4ever Goldy Western Arborvitae*

You'll be rubbing your eyes when you see this hot selection from Ball Ornamentals. It's simply too hard to believe that any plant, especially a needled evergreen like this, could be this brilliantly yellow. Believe it because '4ever Goldy' will deliver the spectacular, non-fading, non-burning color all year! While this color bomb of a plant is far slower growing than its green colored *plicata* relatives, it still grows aggressively enough to be a specimen that will be bright enough to see from earth orbit or a hedge that will be dazzling if you dare! This selection loves full sun and is tolerant of most soils and has the added bonus of orange tinged fall and winter foliage color offset by brilliant deep red stems...no need to worry about winter landscape interest here!

⚙️ 🍷 H: 15-18' W: 3-5' Zones: 4-8

#### **Thuja plicata Fluffy®** *USPP 30,762 Fluffy® Western Arborvitae*

**NEW!** You'll love what Fluffy Western arborvitae does for your landscape! This unique evergreen has soft, bold foliage that emerges yellow and gives the plant a halo-like effect in the landscape. Its cheerful color persists even in winter. It naturally grows with a pyramidal shape that adds structure and shape to the garden. Thanks to its distinctive habit and colorful foliage, Fluffy makes a true statement in the landscape. Try it as a specimen, or pair them at a door or entrance for a dash of fun formality. Proven Winners.

⚙️ 🍷 H: 60-120" W: 36-60" Zones: 5-8

#### **Thuja X Green Giant** *Green Giant Western Arborvitae*

Fast growing and upright with rich, medium-green foliage, this selection is an ideal choice for screening in a hurry! Rumored to be much less palatable to deer than *occidentalis* types, 'Green Giant' is a plant your customers will want to have.

⚙️ 🍷 H: 30-50' W: 12-16' Zones: 4-8
