

HISTORICAL

This checklist is based mainly on records acquired since 1976. It is intended to give current, not historical status. Species documented as occurring in the El Paso area prior to 1976, but which have not been recorded since that year, include (date of last record in parentheses):

Wood Stork (1937)

King Rail (1933)

Northern Pygmy-Owl (1918)

Dusky-capped Flycatcher (1891)

Black-capped Chickadee (1881)

EXOTICS

Species reported in recent years from the El Paso area, but which are believed to be either escaped or deliberately released exotic birds, include:

Mute Swan

Chukar

Ring-necked Pheasant

Northern Bobwhite

Ringed Turtle-Dove

Red-crowned Parrot

Lilac-crowned Parrot

Monk Parakeet

Green Jay

Black-throated Magpie-Jay

Purplish-backed Jay

White-collared Seedeater

HYPOTHETICAL

Species reported from the El Paso area but not yet documented include:

Short-tailed Hawk

Ferruginous Pygmy-Owl

Vaux's Swift

Green Kingfisher

Gila Woodpecker

Eastern Wood-Pewee

Yellow-bellied Flycatcher

Veery

The El Paso/Trans-Pecos Audubon Society gratefully acknowledges these individuals for their support of the publication of this checklist:

Cover artwork by Daniel S. Kilby.

This checklist covers El Paso County, Texas, plus approximately the western one-half of Hudspeth County, Texas (west of longitude 105° 30') and the southern one-third of Doña Ana County, New Mexico (south of latitude 32° 10'). It includes **426** species of birds and 10 additional identifiable forms documented as occurring in the area. Another 25 species are carried on the Historical (5), Exotics (12) and Hypothetical (8) lists on the back page. Species names and taxonomic organization follow the American Ornithologists' Union *Checklist of North American Birds* (7th ed., 1998) as currently supplemented.

This list is our best effort to describe the current seasonal status of birds in the El Paso County area but is not the last word on the subject. A checklist evolves as field observers contribute new information to fill gaps in our knowledge or as changes in environmental conditions cause changes in the status of some species. You can contribute to future improvement of this list by reporting any new or unusual sightings to the El Paso/Trans-Pecos Audubon Society, P.O. Box 972441, El Paso, Texas 79997.

KEY

■■■■■	ABUNDANT: should see on every trip in proper habitat
///////	COMMON: should see on 3 out of 4 trips in proper habitat.
	FAIRLY COMMON: should see on 2 out of 4 trips in proper habitat.
————	UNCOMMON: should see on 1 out of 4 trips in proper habitat.
———	RARE: should see on 1 out of 10 trips or less in proper habitat.
-----	CASUAL: very rare and not expected annually.
•	Indicates an individual record. Species considered ACCIDENTAL have 4 records or less.
•.....•	Indicates a record of a lingering vagrant individual or flock.
*	Confirmed breeding
+	Suspected breeding
‡	Has attempted to breed
/	Irregular; absent in some years, but may be numerous others
L	Localized breeder; breeds in only a limited number of favored areas
Ls	Sporadic localized breeder
Lw	Localized in winter
Ly	Localized year-round

NOTES: • Heavy lines between species names separate avian families.
• For species not seen since before 1980, year of last sighting is in parentheses after species name.
