

STET

Solve the clues below where the answers are from four to eight letters long and include two capitalized words.

However, for both the across and down clues combined, they are not presented in the normal order. Instead they are sorted first by answer length and then alphabetically.

The word “stet” has been inserted around the middle squares for you as a starting point and when the crossword is completed properly; the letters in the shaded squares, reading from left to right and top to bottom, will spell out a phrase related to this word.

Punctuation in the clues may or may not help the solver.
