

I want to burn my piles of leaves and branches.

What do I do?

Call on the day you want to burn your brush.

First you call **Air Quality** at: **442-265-1800** and ask if it is a burn day.

Then if it is a burn day Air Quality will ask you for your name and the address where you are going to burn. They will want to know how many **10x10 piles** you are going to burn.

Air Quality will tell you the time period you can burn your brush if it is a burn day.

Secondly you will need to call the **Salton City Fire Department's Number:**

760-702-7442 and tell them your name and location of the burn site.

That way the Fire Department will know you are burning and will not respond to your burn.
