

## **3D HOUSEHOLD ITEMS**

Item Name	Photo	Description
Coffee Spoon Rest		<p>Our kitchen countertop had become a pattern of "brown spots" from coffee spoons, when they were laid down after using.</p>
Shower Curtain Rod Holders		<p>Our shower curtain rod and the "sticky-back" material which kept it secured to the wall on either side had deteriorated after 15 years and began to slide off its position and fall to the floor. These disks were created to be static placeholders for the rod ends, which were screwed into the walls before re-mounting the curtain rod.</p>
Trash Bag Holders		<p>Although also sold in stores, wanted to design my own version of a holder for a trash bag box. This is mounted using 3M Command double-sided tape to the inside cabinet door with an opening for the trash bags to be pulled out from their rolls.</p>
Foil/Plastic Wrap holders		<p>Always just lying on the bottom of our cabinet, wanted a way to allow these boxes of foils &amp; wraps to be mounted on the side of the inside cabinet wall. Made the design modular for ease of adding as many as needed with the space available.</p>
