Oversize Common Carrier Delivery

All orders with any quantity of shades or blinds or any continuous valance 96" or more in width (or Vertical blinds over 96" in height) are considered oversize. Therefore, a net shipping charge of $40 per oversized unit will be assessed.

Oversized orders that require expedited shipping will be quoted and charged accordingly.

Please see General Information for additional freight and shipping charge information.

FEATURES & BENEFITS

- A gorgeous array of vinyl patterns, from basic curved to deeply embossed styles, in hundreds of colors; includes many S-Curve styles.
- Beautiful fabrics ranging from simple stitchbonds to high-fashion weaves and jacquards.
- Insert Groovers combine the softness and fashion advantage of fabrics with the functional benefits of vinyl.
- Durable, heavy-duty headrail system keeps vanes permanently aligned and offers smooth traversing and quiet operation.
- Optional safety wand control provides an easy-to-use alternative to the traditional control chain and cord and helps protect children and pets from injury.
- Standard full valance adds elegance and a more tailored look. Valance corners are gently rounded to provide a smooth appearance.
- Limited Lifetime warranty ensures your customers' satisfaction.

Care Method 1
Dusting with a feather, or synthetic, non-abrasive, material duster is recommended for all vertical vane surfaces which are lightly soiled.

Care Method 2
Wiping with a soft, damp sponge or cloth, of non-abrasive material, with lukewarm water is recommended for all vinyl vertical vane surfaces.

Care Method 3
Vacuuming with a soft bristle vacuum cleaner brush attachment is recommended for all fabric vertical vane surfaces.

A. Glare Reducing
Softly filters light and reduces glare. Images, shapes and people can be seen clearly. Provides the least amount of light and shape screening.

B. Filtering
Filters strong light. Images, shapes and people can be seen with some clarity. Provides a modest degree of light and shape screening.

C. Shading
Significantly reduces light. Images, shapes and people cannot be seen clearly. Provides a moderate to strong degree of light and shape screening. Darker colored materials tend to provide stronger screening than lighter colored materials in this category.

D. Blocking
Dramatically reduces light. Images, shapes and people are not distinguishable. Provides privacy against most all direct light and shape screening (except minimal light that may seep through closed or overlapping opaque/blackout slats and vanes).

E. Blackout
Blocks out virtually all light (except light that may enter on the sides of the blind and between vanes)) for maximum privacy and darkness.

SIZE SPECIFICATIONS	VINYL STYLES
Minimum Width	12"
Maximum Width	192"
Minimum Height	12"
Maximum Height	144"
Maximum Area (sq. ft.)	192

PRODUCT SPECIFICATIONS

BASIC SIZE STANDARDS & MOUNTING REQUIREMENTS

FINISHED DIMENSIONS
Width and height may vary ±1/8"
Headrail size 1-3/4" x 1-3/8"

INSIDE MOUNT
Headrail unit: 1/4" less than ordered width
Vane length: 2" less than ordered height
Overall height deduction: 3/8" less than ordered height
Minimum mounting depth: 1-3/4"
Minimum mounting depth, flush mount, vanes closed: 3-1/2"
Minimum mounting depth, flush mount,with full valance: 4-3/4"

OUTSIDE MOUNT
Headrail unit: ordered width
OB Valance is 2-1/2" wider than ordered width (1-1/4" on each side)
Vane length: 1-5/8" less than ordered height
Minimum mounting surface height: 1-1/2"

CEILING MOUNT
Headrail unit: ordered width
Vane length: 1-5/8" less than ordered height
Brackets provided: inside mount brackets
OB Valance is 2-1/2" wider than ordered width (1-1/4" on each side)

STANDARD CONTROLS

Traverse Cord and Bead Chain Rotation Controls:

- The traversing cord is 75% of the height of the vertical blind. The vane rotation control chain is 40% of the height of the vertical blind. Longer lengths are available upon request.
- Control Positions – both the traversing cord and vane rotation control chain must be on the same side of the blind. Select left or right.
- Stacking Position – vertical vanes may be stacked

left , right , split or center

VALANCE RETURNS

Inside Mount – No Returns | Inside Mount – Standard | Outside Mount – Standard

OPTIONAL SAFETY WAND CONTROL SYSTEM

- The safety wand is a convenient alternative to the traditional control chain and cord, and helps protect children from injury.
- Twist the wand to rotate vanes open and closed. Pull the wand across the blind to draw vanes back and forth.

- Built-in magnets on the headrail and wand control unit provide a firm lock when blinds are drawn to their fully closed position.
- The wand operates on left or right sides (no split or center draws) up to 144″ in height. The safety wand is ivory in color and is available in three different lengths: 38", 48" & 60" drops.
  You must specify desired wand length when ordering.

Ordered Height of Blind	Recommended Wand Length
12" to 70"	38" Wand
70-1/8" to 90"	48" Wand
90-1/8" to 144"	60" Wand

CERTIFIED BEST FOR KIDS™

VALANCE

FULL 3-1/2" VALANCE – STANDARD ON EVERY BLIND

A 3-1/2″ fabric or vinyl vane is inserted into the valance and mounts to the headrail. Valance corners are gently rounded and have a continuous material insert that provides a soft look. Standard returns, measuring 5-3/4″*, will be included on all outside mount valances. These may be trimmed down at the time of installation if necessary. Longer returns are available upon request at no additional charge.

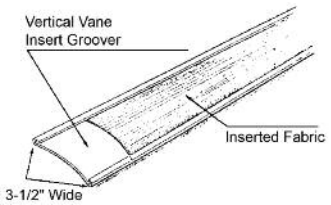

Note: Wood Textures only available with square-wrap corner returns.

* The 5-3/4" total return length includes a valance return cut measuring 4-1/2" which is attached to a rounded corner measuring 1-1/4". The total return length from the back of the valance to the end of the attached return equals 5-3/4".

INSERTED MATERIALS

- Insert vertical blinds let you combine the fashion advantages of decorator fabrics – a spectrum of colors and a variety of soft textures – with the functional benefits of vinyl – energy efficiency, privacy, light control and a uniform look from the outside. The Insert Groover is available in both white and ivory.
- The Insert Groover, provided on all insert style verticals, is guaranteed to remain beautifully clear for the lifetime of your vertical blind because state-of-the-art plastics are used to formulate the clear edges. Edges won't yellow or crack...even with prolonged exposure to harsh sunlight!
- All materials inserted into Groovers will be secured into position with a small button at the top of each vane. Most fabrics can be inserted. Each fabric deck indicates "Free Hang" and/or "Insert Groover". The "Collection Information" page also indicates if the fabric can be inserted.
- You may also purchase an Insert blind without fabric inserted. These blinds are provided with an adhesive back laminating insert material so that you may bond and insert your own fabric or wallpaper. (See price Group C).

FEATURES AND OPTIONS

HEADRAIL SYSTEM

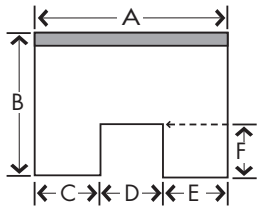

- Smooth traversing and quiet operation
- Heavy-duty aluminum channel
- 100% Celcon carriers and hooks
- Durable graphlite wheel system
- Vanes never go out of synchronization
- Reversible track – left or right control
- Snap-in brackets make installation fast and easy

Installation Brackets								
Width Up to:	32"	56"	80"	104"	128"	152"	176"	192"
	2	3	4	5	6	7	8	9

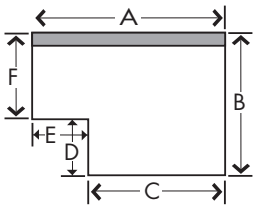

TILE CUT-OUT

A Tile Cut-Out allows a vertical blind to hang straight and not catch on an obstruction.

Bottom Center Cut-Out

Bottom Side Cut-Out

- Some blinds have operating restrictions
- Bottom Center Cut-Out must be split stack
- Bottom Side Cut-Out must stack to center or longest side

Note: For cut-outs, the vane will be cut across the entire width of the vane. We are unable to cut notches within individual vanes during production.

REPLACEMENT VANES

When ordering, specify whether you are providing "exact height of vane" as opposed to Inside or Outside mount.

Fabric: Finished with a top vane hanger, finished bottom hem, and sewn-in weight (chains available upon request.)

Insert Groover: Finished with attachment hole punched at top of vane. Buttons to secure inserted fabrics at top of vane also included.

All Others: Finished with attachment hole punched at top of vane (keyhole punch at bottom and chain available upon request.)

BOTTOM TREATMENTS

- **Fabrics:** Patented ultrasonically sealed-in weights are included standard on all free-hang fabric vertical blinds at no additional charge. A small section will be left open on the back side of the vane for bottom chain attachment. Bottom chains available upon request only.
- **Vinyl:** Bottom chains and keyhole punch available upon request only at no additional charge.
- **All Other:** Bottom chains not available for Insert Verticals.

PRODUCT SPECIFICATIONS

VANE COUNT & STACKING SPACE CHART

VANE COUNT CHART — Use “Number of Vanes" column to order the correct number of vanes.

STACKING SPACE CHART — Use “Stack Width" column to determine how much of the wall/window will be covered when the blind is fully open.

CLEAR OPENING — Use “Clear Opening" column to determine how much of the window will be showing when the blind is fully open.

VANE VIEW FOR S-CURVE VERTICALS

When placing an order for "S" shaped vertical styles, you must specify a stack position (right, left, split, or center), control position (right or left), and vane view (right or left). See illustration below for examples and descriptions. Ordering these correctly is important since S-shaped vanes cannot be flipped during installation like curved vanes.

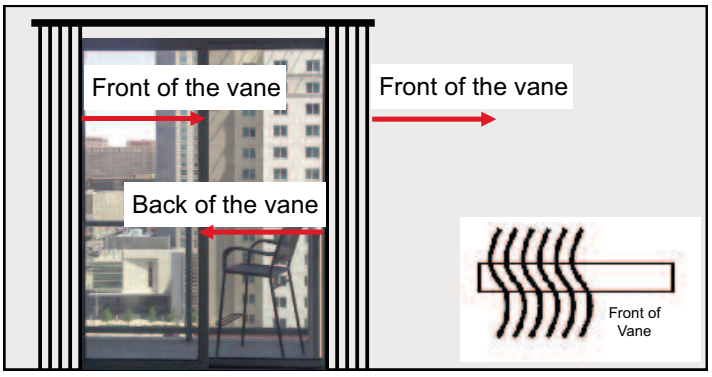

Left stack with vane view right

The front side of the vane (the side with the pattern and color) will face to the right when the vanes are in the open position or stacked. Ideal for when the sliding glass door is on the left side or in the center of the wall and left stack is desired. Control position can be either left or right. With a left control position, the controls will be partially hidden by the vane stack.

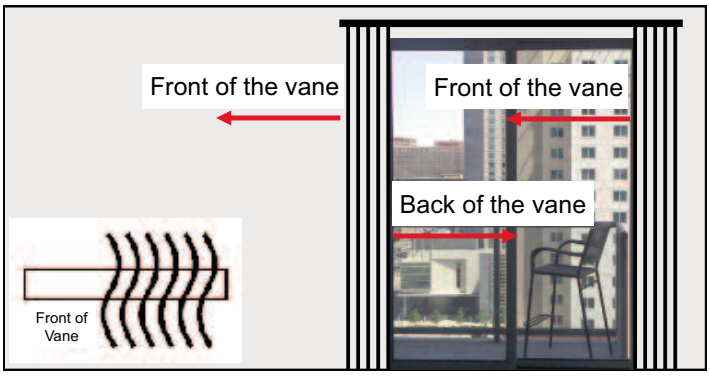

Left stack with vane view Left

The front side of the vane (the side with the pattern and color) will face to the left when the vanes are in the open position or stacked. Ideal when the sliding glass door is on the right side or in the center of the wall and left stack is desired. The control position can be either left or right. With a left control position, the controls will be partially hidden by the vane stack.

Split stack with vane view right

When ordering a split stack, vane view right is standard. The front side of the vane (the side with the pattern and color) will face to the right when the vanes are in the open position or stacked. Ideal for when the sliding glass door is on the left side or in the center of the wall and a split stack is desired. The control position can be either left or right.

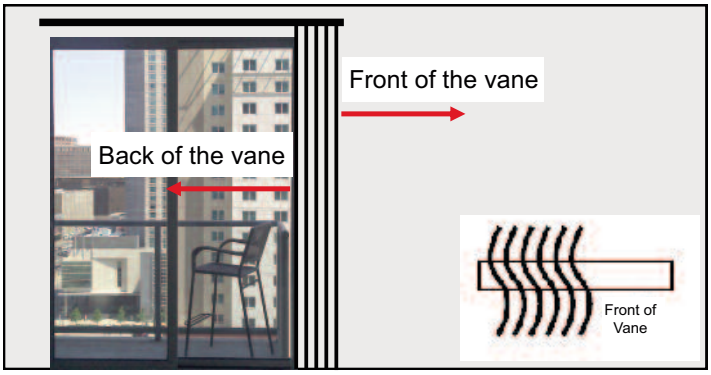

Split stack with vane view left

When ordering a split stack, vane view left is optional. The front side of the vane (the side with the pattern and color) will face to the left when the vanes are in the open position or stacked. Ideal for when the sliding glass door is on the right side of the wall and a split stack is desired. The control position can be either left or right.

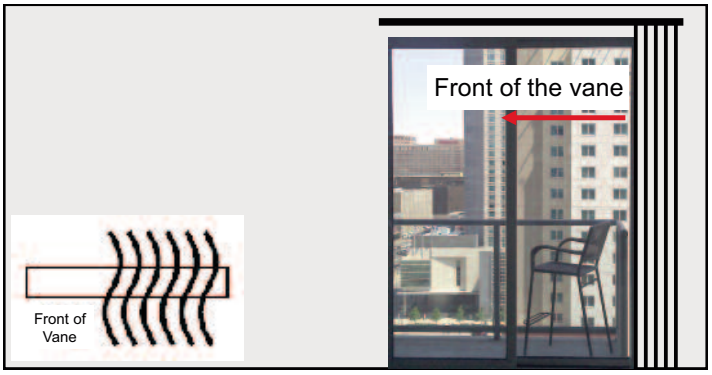

VANE VIEW FOR S-CURVE VERTICALS

When placing an order for "S" shaped vertical styles, you must specify a stack position (right, left, split, or center), control position (right or left), and vane view (right or left). See illustration below for examples and descriptions. Ordering these correctly is important since S-shaped vanes cannot be flipped during installation like curved vanes.

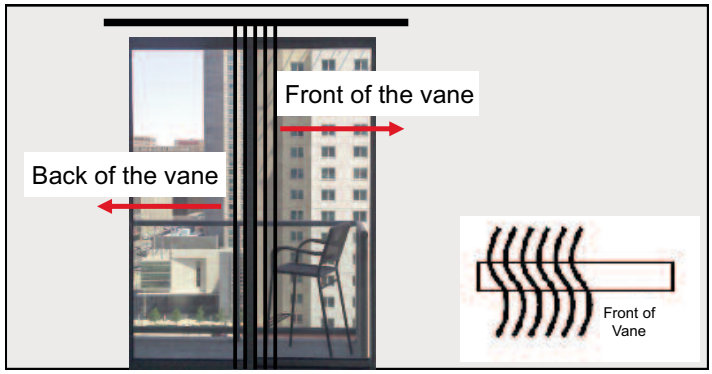

Right stack with vane view right

The front side of the vane (the side with the pattern and color) will face to the right when the vanes are in the open or stacked position. Ideal for when the sliding glass door is on the left side or in the center of the wall and right stack is desired. The control position can be either left or right. With a right control position the controls will be partially hidden by the vane stack.

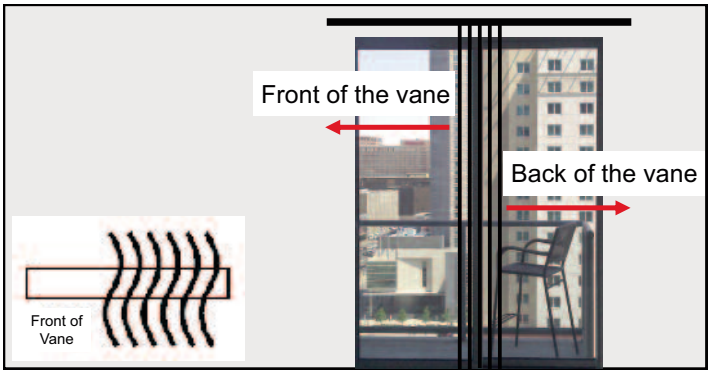

Right stack with vane view left

The front side of the vane (the side with the pattern and color) will face to the left when the vanes are in the open or stacked position. Ideal when the sliding glass door is on the right side or in the center of the wall and right stack is desired. The control position can be either left or right. With a right control position the controls will be partially hidden by the vane stack.

Center stack with vane view right

When ordering center stack, vane view right is standard. The front side of the vane (the side with the pattern and color) will face to the right when the vanes are in the open position or stacked in the center. The back side of the vane will show to the left. Ideal for when the sliding glass door is on the left side or in the center of the wall and center stack is desired. The control position can be either left or right. Center stack is a good option when access to a right door opening and a left door opening is needed and stacking off the window is not possible.

Center stack with vane view left

When ordering center stack vane view left is optional. The front side of the vane (the side with the pattern and color) will face to the left when the vanes are in the open position or stacked in the center. The back side of the vane will show to the left. Ideal for when the sliding glass door is on the right side or in the center of the wall and center stack is desired. The control position can be either left or right. Center stack is a good option when access to a right door opening and a left door opening is needed and stacking off the window is not possible.
