To: Mr. Jorge Sosa
Transcon Lighting System

Re: Lighting System Upgrade

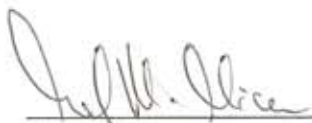

Baxter Healthcare of Puerto Rico had an energy and cost reduction goal. Various projects were explored and lighting retrofit was selected as one to be implemented.

Transcom Lighting System performed a preliminary assessment and it was found that we had a potential energy saving in our facility. After evaluate several contractors Transcon was our better option with an investment of \$276,495 with a ROI of 53%.

The project was completed in a very safe, professional and highly technical way within our available time. The group was flexible on time schedules and adopts high achievements to perform the project without affecting any operation in the plant.

Thanks for your contribution in our energy conservation efforts.

Sincerely,

Angel Alicea
Sr. Principal Engineer

Carlos Montesinos
Facilities Manager
