No. 21S-F.B.—Same as No. 21S except Fibre backed and Dacron string. Wt. 1 lb., 1 oz.

LEMONWOOD HUNTING EQUIPMENT

The consensus of opinion of those hunters who want an all around hunting bow for most uses in this country is that the bow should have the following qualifications:

- 1—Bow should be short in order not to catch in thick underbrush.
- 2—Bow should be fairly light in weight (perhaps from 50-60 pounds) in order that maximum accuracy may be maintained.
- 3—Bow should be hardy enough to stand vigorous weather and not be fractured from average abuse.

- 4—Bow should have arrow guide to protect left hand against splinters which sometimes develop in arrows that have been driven into hard objects either in roving or hunting. This also aids in quick, fast shooting.
- To fulfill all the above specifications and also it goes without saying that most important, quality of cast to be considered, we recommend a bow that we have built with all the above in mind. These are shown below.

No. 358 BACKED LEMONWOOD HUNTING BOW—This bow is designed for hard hitting and distance shooting. Backed with double black and white fibre. FULL VIEW SIGHT WINDOW IN HANDLE GRIP. Leather Grip. Pulls to 65 lbs. Width at widest place 2". Length over-all 5'3". Distance nock to nock 5'2". Double loop "Ludlow Quality" bow string with 6" serving. Guaranteed to stand up and give service. Wt. 1 lb. 8 ozs.

No. 358-SFB SPLICED—A good hard-hitting Lemonwood Hunting Bow. Single Fibre back. FULL VIEW SIGHT WINDOW IN HANDLE GRIP. Width at widest place 1 3/4". Leather grip. Pull limit 50 lbs. 5'3" long. Strong hemp string. Hand tillered. Wt. 1 lb. 6 ozs.

ACCESSORIES

No. 43 DURABLE BOW STRINGS—Italian hemp. Spliced loop on one end and open other end plain. Strong and practical. A good string for cheaper bows. Carded. Made so can be used for 5', 5½', 5' 8" and 6' bows.

No. 43S—Same as 43 except center served. Specify bow length.

ARCHERY HANDBOOKS

No. 46—Useful information that deals with the following: Care of tackle. How to shoot. Standard Rounds. Terminology.
No. 47—Deals with Hunting and Field Shooting.

TARGETS

This Target is very popular and is made with the straw being compressed in a burlap bag and then tufted like a mattress which makes it hard and firm.

TARGET COMPLETE

(Compressed in Burlap with Face)
(Wheat Straw)

- No. 50 Wt 12 lbs. 4" thick, 24" diameter
- No. 51 Wt. 30 lbs. 5" thick, 36" diameter
- No. 52 Wt 55 lbs. 6" thick, 48" diameter

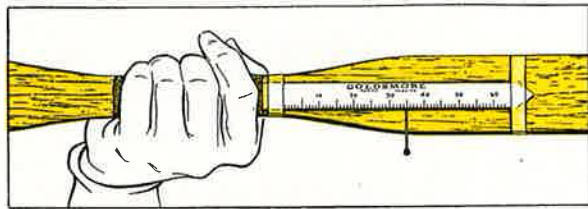

No. 60 TARGET STAND—Tripod type. Legs turned round. Smoothly finished and painted green. Has crutch tips to arrest sliding. Woodstock of best Hickory. Wt. 7 lbs.

No. 45DL — DACRON BOW STRINGS — strictly handmade with double spliced loop. Center served. Stretched to insure maximum tensile strength. This string is treated with our special formula to insure long service. Plastic boxed. Made especially for glass bows. When ordering state out to out of loops and bow weight. For bows 25 lbs. to 80 lbs.

No. 45SL—Same as above except single loop.

No. 95—GOLDSMERE BOW SIGHT—White celluloid mounted on Cork. Calibrated. 7" long.

EXTRA OILCLOTH FACES

Our Oilcloth Target faces are made on heavy dull finish superfine Oilcloth and not on cheap Sign Cloth. They are hand-painted with clearly defined colors. When placed in the sun they have no glare.

Our Slip On faces have skirts sewed on and can be pulled completely over the Target and tied with a draw string in the rear. This special covering protects the Target if it is left in the rain.

- No. 59 36" Square, paper
- No. 393 48" Square, paper

ACCESSORIES
NEW ITEMS FOR ARCHERS

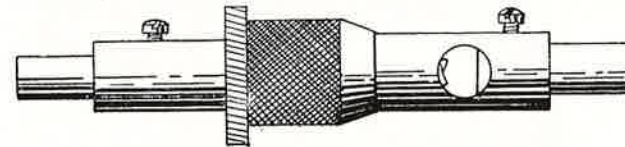

THE UNIT FEATHERING TOOL

M30—The Improved Unit Feathering Tool consists of three feather-holding arms hinged to a central member. The arms are spaced 120 degrees apart by the dividing head, and are wide enough to hold the feather at right angles to the surface of the shaft. Each arm consists of two separate members and these may be spread to insert the feather or for cleaning, or to prevent damage to feathers in repair work when one or more feathers are in the arrow. These arms hold the feather by the vane, and if it is desired to hold them more tightly, small paper clips may be employed. Cut or stripped feathers may be used. This tool is designed for use with 5/16ths inch shafts. For smaller shafts, the inner surface of the arms must be filed away until the arms are adjusted to the shaft. For 3/8ths inch shafts, the nock end of the arrow should be tapered until it fits the tool. A little oil or vaseline may be rubbed on the inner surfaces of the arms to prevent them from adhering to the shaft or feathers.

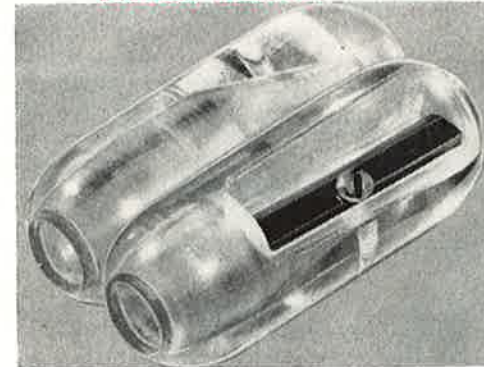

TENON CUTTER

EASY TO USE — ACCURATE — PERFECT RESULTS

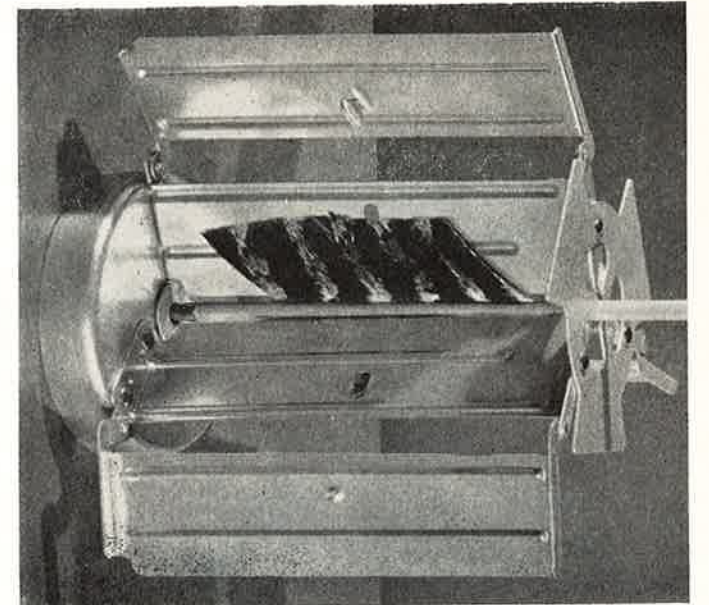

No. M60—This is the ideal tool for shouldering all arrow shafts to attach the points. It will take all sizes of shafts from 5/16 down to 1/4 inch. There is an adjustable stop to limit the depth of the cut and openings to allow any dust which may accumulate to escape. Once the cutter is set it can be locked in position for accurate repeat cuts. This cutter operates best when rotated with a motor or hand drill. It is accurately machined and with reasonable care should last indefinitely.

TAPER TENON TOOL

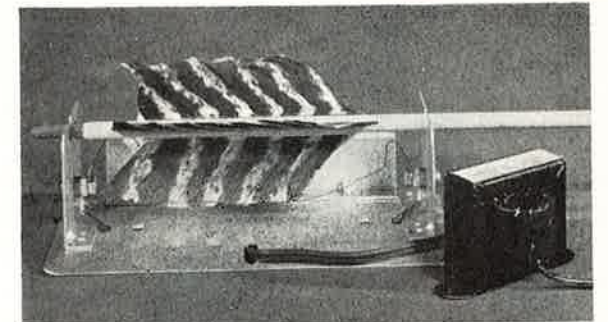

Precision Taper Tenon Tool for cutting tapers on arrow shafts for installation of nocks and arrow points. Molded of high impact plastic. Improved design, side by side cutters for greater leverage and ease of cutting. Side by side cutters, one for nock taper the other for point taper. AVAILABLE IN 3 SIZES.
No. M61-1—for 5/16" parallel point.
No. M61-2—for 5/16" hunting or field taper.
No. M61-3—for 11/32" hunting or field taper.
M-1 cuts 11° (degree) nock taper & parallel point.
M-2 & M-3 cuts 11° (degree) nock taper & 5° (degree) point taper.
ALL MODELS HAVE RAZOR SHARP STAINLESS STEEL BLADES.

ALL LENGTH FLETCHER

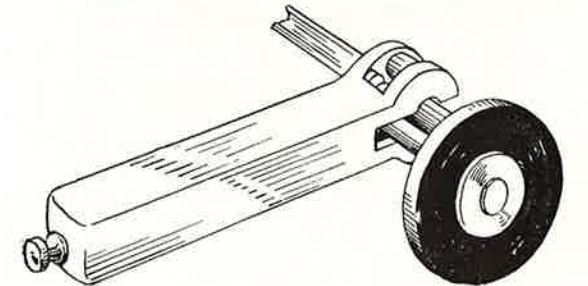

No. 36M—All length Fletcher. Fletches feathers up to 5" long. Handy, accurate, easy to operate. Coat metal parts where feather touches with vaseline to prevent feather from sticking to metal parts.

ALL LENGTH FEATHER BURNER

No. 37M—All length feather burner. Does a neat accurate job fast. Equipped with transformer.

ARROW POINT KNURLER

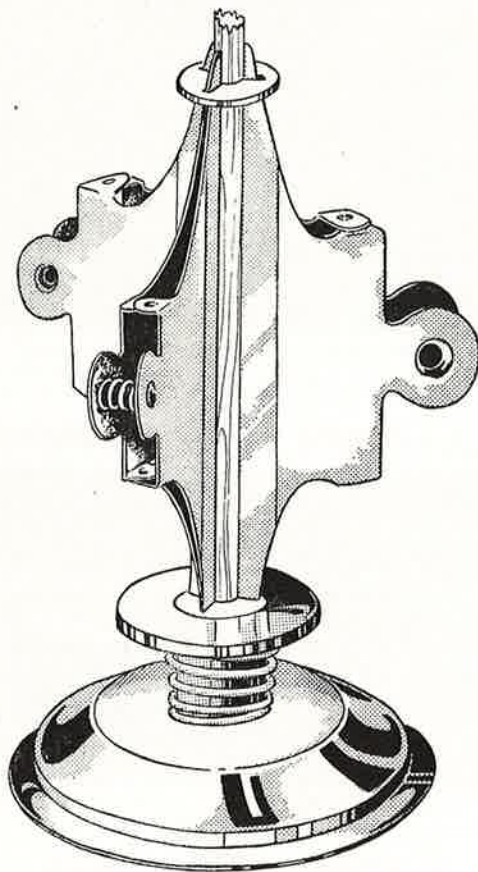

No. 94C—This Arrow Point Knurler is small enough to carry in the pocket or kit, and may be used in the shop, at home or in the field. Can also be used for attaching aluminum nocks. The tool attaches a point better than any other means available to the archer and makes a more attractive arrow. Not recommended for steel piles.

MISCELLANEOUS

- No. 336**—Waterproof cement for fletching. Large generous tube. Can also be used for household purposes. Will mend practically anything.
- No. 337**—Linen thread. 2-oz. balls.
- No. 338**—Bow string wax (special formula). Large round cake.
- No. 339**—Dacron. 4 oz. spool.

ACCESSORIES

ADJUSTABLE TIME SAVING FEATHERING TOOL

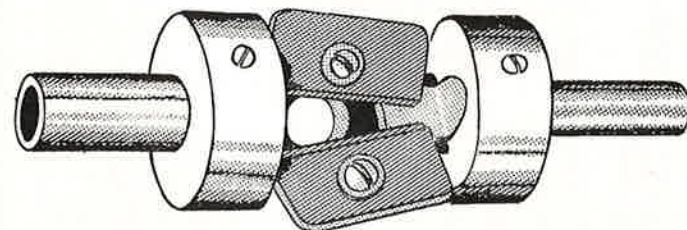

M35—Feathering Tool

Here is a handy, time saving tool for feathering arrows quickly and easily. All three feathers can be applied at once without waiting for others to set. Adjustable—fits all size shafts—straight or tapered. Simple to operate. Three clamps tapered at lower end to fit slot in base of tool hold feathers. As these clamps are forced downward into slots they automatically center upon the shaft no matter what the size. A holding disc with three uniformly spaced slots, to engage upper end of clamps, locks clamps in position, with feathers firmly held against shaft until glue sets.

DIRECTIONS

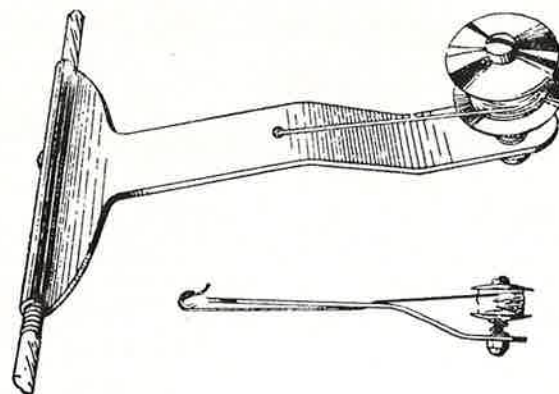

Put the "cock" feather on first. Adjust all three clamps to same elevation before putting on the holding disc. To remove, press down on the ring at the base, and open and remove clamps.

TENON CUTTER

No. 200—New Improved 2 in 1 Adjustable Tenon Cutter. A completely adjustable Taper Tenon Cutter for cutting any size tenon and any taper for arrow points or nocks. Makes the fitting of points and nocks a simple, quick operation. Serves both purposes of tapering nocks and points.

LIGHTNING STRING WHIPPER

No. 94B—The Lightning String Whipper provides a means of rapidly whipping the string at home or on the field. The bobbin at one end holds the thread, hook at the other end engages the string and holds the tool against loosening or falling away from the string. With this tool the string may be grasped upon either side of the tool and by twirling the tool rapidly about the string, the center can be whipped in a fraction of the time required by other methods.

No. 93 BOW FISHING REEL, CENTER SHOT for more accurate shooting. Comes with 75 feet braided Nylon Bow Line. 80 lb. test. Wt. ea. 8 oz.

BOW AND ARROW MATERIAL

LEMONWOOD BOW STAVES FLAT TYPE
(Selected Quality)

Fold target on center line. Stand on ground in inverted "V" shape. This makes a wonderful knock-over target with both animals in an upright position.

To Our Customers and Friends

The Indian Archery and Toy Corporation was organized in 1927. From its incipency we have continuously toiled, created, and brought to the market Archery products of beauty and improved from a practical point of view to give Archers throughout the land the best that can be expected. We feel we have always been the leaders in this respect.

We have thoroughly established our good will by giving all of our customers fine products, good service, and cooperating to the fullest extent.

We guarantee every piece of merchandise to stand up and give service. We have thousands of satisfied jobber, dealer, and department store accounts and new accounts coming along every day.

We, also, wish to thank our loyal customers for the fine support they have given us.
