ABOUT

Isabelle is a graphic designer in Bellingham Washington. Her favorite aspects of design are the things she can do with a nice pen on a happy white page. Isabelle loves illustration, hand lettering and creating icon systems. In addition to the drawing aspects, she also love creating branding systems, package design, and page layout.

GENERAL SKILLS

Drawing	Extensive vocabulary	Asset Creation
Painting	Proper grammar	Mac and PC knowledge
Hand-lettering	Quick typing	Strong organizational skills
Photography	Social media management	Time management

EXPERIENCE

GRAPHIC LEAD

Grizzly Industrial | June 2018-Present

As a Graphic Artist for Grizzly Industrial, I created marketing material, both online and for print. I worked within a rigid corporate structure to create graphics that went along with a look and feel previously cultivated by this Bellingham-based company. When promoted to Graphic Lead, I assigned tasks, managed projects, and took on all the print buying for the company. I also worked with our Marketing director to negotiate marketing contracts, process marketing invoices and coordinate production of marketing assets.

FREELANCE DESIGNER

Online & Local | Feb. 2018-June 2018

As a Freelance designer, I have done almost everything. I've made several logos, created branding guidelines, I've managed social media, photographed product, made mockups, designed apparel graphics and more. As well as managing my own time and finances. Freelancing has been the biggest challenge of my career.

SOCIAL MEDIA MANAGER

Helene & Co. | Sep. 2017-Jan, 2018

Helene & Co. is a brick-and-mortar store and real-estate staging company. At this job I work closely with the owner of these businesses to create a unified presence from staging to store. I showcase the design aesthetic through social media posts, while also enticing customers to come to the out-of-the-way storefront.

MARKETING INTERN

Seeking Health LLC | March 2017-June 2017

Seeking Health is a health supplement company that has recently become a huge player in a major market. I was lucky to have been their marketing intern, where I learned a lot about everything from web design to packaging, marketing and analytics analysis.
