### Lake Cascade Update

Samples taken at Cascade Lake last week indicate the presence of toxins in the water. The [Central District Health](#) determined that the levels are below the health advisory threshold at this time.

It is important to remember that toxins can be present at varying concentrations throughout a water body and can pose a risk to people and animals. Changes in the weather can also impact bloom locations and toxin concentrations. DEQ always urges caution when recreating in and around water during the hot summer months.

*When in doubt, stay out (that goes for your pets as well)*

## Please, **BE WATER WISE**

### It's a common question. Where does City water come from?

The City of Cascade **DOES NOT** pump water from Lake Cascade.

Drinking water for the City of Cascade comes from deep source wells.

City drinking water is minimally treated with chlorine during the distribution process.

When you turn on your tap you are getting cool, fresh water.

Access the 2021 CONSUMER CONFIDENCE REPORT by visiting the Cascade website. Click on City Government, then Public Works and 2021 Consumer Confidence Report.
