

# ARE YOU SURE ABORTION IS SAFE?

The common thinking today is that abortion is a safe procedure. What is not said is how many complications and deaths have occurred from legal abortions. Were you aware there have been more abortion related deaths in recent years, than before Roe vs. Wade made abortions "acceptable?" Having an abortion will kill your baby and it just... Might kill you, too.

## ABORTION DEATH

**Holly Patterson, age 18**  
Death from taking the abortion pill Ru 486.

## LIFE TESTIMONY

**Karen Gutierrez**

*"I was saved from this abortion clinic, I chose life for my son Santiago and now I don't cry but pray for God to bless my Son with many years of life."*

**Most women do not realize their baby is formed by the 6 weeks of pregnancy.**

## ABORTION PILL REVERSAL

Have you taken the first dose of mifepristone (also known as RU486 or the "abortion pill")?

Do you regret your decision and wish you could reverse the effects of the abortion pill? It may not be too late.

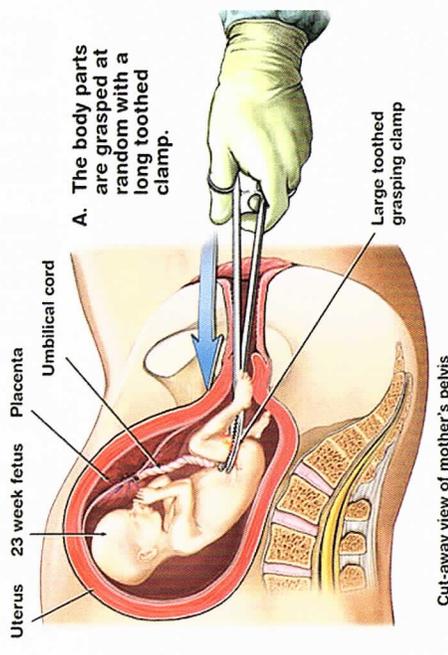

Call (877)558-0333 for help right away

## ABORTION IS NOT WITHOUT RISKS

A lot of "experts" might tell you that abortion will take away your problems, but for many women it causes more, including serious physical complications. These risks are listed on an abortion provider's consent forms:

- \*Blood clots in veins and lungs
- \*hemorrhage (heavy bleeding)
- \*potential for infection
- \*Damage to the uterus
- \*Sterility
- \*Injury to the bowel and/or bladder
- \*Failure to remove all products of conception that may result in an additional procedure.
- \*Even Death

# SECOND TRIMESTER ABORTION

If you are having a second trimester abortion your cervix is dilated by the insertion of Laminaria. If you had laminaria inserted, we can arrange for a competent physician to remove them. Please call the Living Well Clinic hotline at (714)633-4673 Laminaria does not harm your baby! You can continue your pregnancy with only a slight risk of infection or miscarriage.

A physician in Orange County has remove laminaria for 50 women with only one case of miscarriage. That is a 98% success rate! Please let us help you to save your baby's Life!
