

The Laser Personal Electronic Target (PET) is a standalone laser training target that when combined with any SureStrike™ Laser Cartridge does not require a computer. This highly mobile target can be easily moved and setup for different scenarios in your home laser training range. Buying the 3 pack will give you the ability to do all of your tactical training and much more. By having multiple targets you can set up various scenarios (putting them in different rooms). Train at home, as military and police do in shoot houses.

This smart target helps improve your shooting skills with four skill modes. The LaserPET can keep track of hits, act as a shot timer, and even help you speed up your reload times. The LaserPET gives the shooter instant audible feedback when a hit occurs and its easy to read screen displays training statistics like hit times.

The LaserPET will not read Infrared (IR) Lasers
