

Industrial Ecology – connecting business for efficient ‘waste’ management

The NSW Minister for the Environment has announced the ‘[CiRculate](#)’ Program as part of the NSW Government’s Waste Less Recycle More Initiative’s five year, \$465.7 million package to transform waste and recycling in NSW.

As part of this Initiative, the Industrial Ecology ‘CiRculate’ Program aims to:

- work with medium to large business in the commercial and industrial waste sector
- set up networks and connect businesses with a view to exchanging materials rather than recycling or landfilling;
- help business become more efficient at managing materials and energy inputs / outputs, and;
- reduce waste to landfill.

Engenuity Solutions in partnership with zeRRRo has been awarded the contract for the South East of NSW – ‘CiRculate South East NSW’, concentrating on timber waste. However, we may be able to assist with other waste streams that present a problem to business.

[Engenuity](#) and [zeRRRo](#) bring a vast practical experience in waste management and resource recovery to this Project and are here to help business save money and resources.

We will assist business via:

- Waste Assessment – high level to determine the need for assistance
- Waste Management Plans – overview to help business with their resource recovery
- Advice and assistance throughout the CiRculate process
- Follow up Assessment to determine business success and ongoing resource recovery needs as per program requirements

These services are at no cost to business – waste charges turned into resources! This project is a NSW EPA Waste Less, Recycle More initiative funded from the waste levy.

We would appreciate the opportunity to engage with your Members/Stakeholders/Customers and to discuss options for this engagement at your earliest convenience.
