

Custom Shutters

Features

- > Offered in 2 ½", 3 ½", and 4 ½" louver sizes, in a choice of four neutral colors
- > Available with a wide selection of frame styles to fit most any inside or outside mount window applications
- > Patented Seamless louver caps eliminate the seam between the louver body and the end cap for a sleek, modern look
- > Patented tilt bar and connecting method eliminates unsightly gears and staples
- > Exclusive Light Block & Interlock feature covers unwanted light gaps between panels and provides a superior seal for enhanced insulation to help reduce heating and cooling bills
- > Environmentally friendly – our shutters are Greenguard™ certified
- > Quick and easy to install – all frames are pre-drilled and feature two-part hinges that are pre-installed

Louver Sizes and Colors

- > Choice of 2 ½", 3 ½", and 4 ½" louver sizes
- > Offered in these colors: White, Ivory, Almond and Tan

Frame Styles

- > C-Frame (Casing Frame) – used for outside mount only. Installs on the wall or directly on top of existing trim.
- > L-Frame – can be used for inside mounts if window openings are square, or outside mounts directly on top of or beside trim.
- > T-Frame (Trim Frame) – used for inside mounts in openings with drywall returns and without trim. May be ordered with a sill frame at the bottom.
- > Z-Frame – used for inside mount applications only. Ideal for slightly out of square windows. Blends well with all types of trim.
- > D-Frame – used for inside mount only. Ideal for out of square windows or bullnose rounded corner openings.

Hinges

- > Regular – features two-leaf design with removable pins, providing easy installation and removal for cleaning
- > Extended – used only to install panels without a frame to provide depth adjustment
- > Bent Leaf – used for inside and outside mount with ¾" and 1" mounting strips

Shutter Configuration

Styles include:

- > Single Panel
- > Multiple Panel
- > Café
- > Bi-Fold
- > By-Pass
- > French Door Cut-Outs also available to accommodate lever style handles

Specialty Arches

- > Offered in 2 ½" and 3 ½" louver sizes
- > Styles include: Eyebrow, Quarter-Circle, Half-Circle, Tunnel, Elliptical

Tilt Bar

- > Patented tilt bar and connecting method – enables shutter louvers to be opened or closed in both directions, eliminating unsightly gears or staples which can rust or break. Durable connectors never need replacing.
- > Optional Clearview tilt control – features hidden louver joiners, providing an unobstructed view and a cleaner appearance from the front.

Hardware and Installation

- > Snap and hold Corner Keys and mitered Corner Joints – hold frames securely together and eliminate the use of glue. All frames feature pre-drilled installation holes that are strategically placed, allowing for accurate, quick, and clean installation. Screw hole button covers are also provided to provide a finished look.
- > Panel Lock Catch System – locks panels into place on the frames eliminating the need for magnets, however, magnets and catches are available upon request.
