

## ABOUT MOM PROM

Mom Prom is a highly anticipated ladies' night out and a celebration of all women. Mothers, daughters, sisters and friends will gather to laugh and be silly while generously supporting pediatric brain cancer research.

Nearly 200 professional women will travel by party buses and limos from throughout the Merrimack Valley and Boston's North Shore and Metro West suburbs. They'll dance and pose in the photo booth. They'll vie to be crowned Mom Prom Queen, win drawing prizes, and to be the high bidder of coveted silent auction prizes.

Pediatric Low-Grade Astrocytomas (PLGAs) are the most common pediatric brain tumor. There is no cure for PLGAs, and many are inoperable. First line chemotherapy for PLGAs has not changed in nearly 30 years and is toxic, ineffective and causes significant and permanent collateral damage to growing children. With scientific advances, accelerating research to find more effective targeted therapies is quite realistic. All funds raised by the AKBTC Mom Prom help make a difference.

## ABOUT US

A Kid's Brain Tumor Cure Foundation (PLGA) Foundation) was founded in 2007 as a 501(c)(3) organization to give hope to children battling Pediatric Low Grade Astrocytoma brain tumors by raising funds for targeted scientific and medical research.

Chickaroo is the nick-name of Caroline Hamilton. This affectionate moniker was elevated to team status in 2007 when Caroline was diagnosed with the most common type of pediatric brain cancer, the PLGA. Discouraged with archaic, toxic and ineffective treatment options, her family and friends embarked on a mission to make a difference. Since then Team Chickaroo has raised over \$900,000 for PLGA research. All funds raised by the Team Chickaroo Mom Prom will support the PLGA Research Program at Dana-Farber Cancer Institute.
