Hi all,

Have you ever wanted to knock doors and talk to your neighbors about why you're a Democrat in an off-cycle year? Us too.

That's why we're so excited about this new app for iPhone users that gives you the opportunity to knock 10 doors any time, any place, within minutes.

The DNC has released a new app for iPhones called **Knock 10**, which makes knocking on doors extremely accessible for volunteers. Once you've downloaded the app, you simply create a log-in and the application will provide you with 10 doors near you to knock - all with the click of a button. When you knock on these doors, you'll help us and Democrats across the state by (1) identifying and talking to Democrats in your area, (2) improving the data we have for the future and (3) building volunteer capacity for Democrats across the state!

**[You can download Knock 10 from the App Store here.](#)** After signing in with your existing Action ID, or creating a new one, the app creates a list of ten households near you and an easy to follow script. **[This document has step-by-step instructions on how to use the app.](#)**
