

## NEW JERSEY DEPARTMENT OF TRANSPORTATION

### ROUTE 94, BRIDGE OVER PAULINS KILL & CR 521 (STILLWATER)

Pre-Construction Public Information Center  
Blairstown Municipal Building  
106 Route 94, Blairstown, NJ 07825  
October 3, 2018, 6:00 PM – 8:00 PM

The New Jersey Department of Transportation (NJDOT), committed to developing transportation improvements that best balance transportation needs, the environment, community concerns and cost. One of the most critical elements related to the success of a project is the relationship that NJDOT develops with the community. Accordingly, an information center has been scheduled to present the plan to replace the superstructure at the Route 94 Bridges over Paulins Kill. You are encouraged to actively participate by providing comments at the meeting, by mail, or by e-mail.

#### The Meeting

The Pre-Construction Public Information Center will be held on **Thursday, October 3, 2018 at the Blairstown Municipal Building, 106 Route 94, Blairstown, NJ from 6 PM to 8 PM.** Please attend at a time that is convenient for you. The purpose of the Information Center is to introduce the NJDOT's Resident Engineer who will be overseeing the daily construction work, and the contractor, Ritacco Construction, Inc. of Belleville, NJ. There will be opportunity to ask questions and discuss concerns with representatives from the NJDOT, our Design Consultant and the Contractor.

#### Background

The NJDOT has evaluated the condition of the bridge and developed a plan prioritizing the items of work necessary to extend and maximize the bridge's useful service life. The Paulins Kill Bridge, constructed circa 1931, consists of 3 spans approximately 161' long. The structure provides

two lanes of mainline traffic with shoulders on both sides of the roadway.

#### The Project

The major items of work to be accomplished under this project include:

- Superstructure replacement at the Paulins Kill Bridge.
- Substructure unit modifications for the new superstructure at the Paulins Bridge.
- Stage construction at the structure.

Replacement of the superstructure at the Paulins Kill Bridge will be accomplished in stages to maintain 1 lane of 2-way traffic in stages 2 and 3 respectively and 2 lanes of traffic in stages 1 and 4. Temporary traffic signals will be used to control the flow of traffic when 1 lane of 2-way traffic is maintained. Traffic will be maintained on Route 94 at all times during construction.

#### Construction Schedule

Start: Fall 2018  
Completion: Spring 2020
