

Being a business owner can be a rewarding, yet challenging experience. Many people go into business because they are skilled in a certain industry and or trade, however, even the most skilled individual has a point where they need assistance. Djd. InDepth Consulting Services has developed a personal coaching model that is set to meet the client where they are. This can range from having a business idea and not knowing where to start, all the way through business valuation with the intent to sell. We work with our clients to ensure they understand the key aspects of whatever decisions they are making, and work to educate them on the practicalities of achieving business success.

Business consulting is a core way of assisting business owners in the realm of performance, goal setting, and idea generation. We see this process as a means to work with our clients on a personal level to ensure their individual needs are met. We provide a complimentary consulting session to assist business owners with realizing their business need, and offer a plan of execution to capitalize on it. We hold all of our clients to a high standard, and provide dedicated assistance every step of the way. It is our job to go beyond the surface level of the business, and pull our clients level of thinking to the next level. We provide thought provoking tools, activities and scenarios that not only aid in growing the business, but also help in crafting the "business plan". We assess the business or the business idea and provide relevant feedback on areas of opportunity or points of clarity and work with our clients in an one-on-one setting, providing the highest level of confidentiality and professional expertise.
