# WHY CHOOSE *UNI-ACE*™ ?

## FORKLIFT TIRE SPECIFICATIONS

**Aggressive Extra Deep Lug**  
One of the deepest lugs available, the Uni-Ace tire offers maximum traction for the life of the tire.

**Tread Rubber**  
The blend of natural and synthetic rubber provides outstanding abrasion resistance. Our tread compound runs cooler which will extend the life of the tire.

**Core Rubber**  
The special core design will provide a level of comfort comparable to that of a pneumatic tire.

**Base Rubber**  
The rubber base is manufactured with a high durometer rubber mix and is convex in shape. This allows greater stability and grips the wheel.

**Steel Bead Wires**  
The base of the Uni-Ace is reinforced with multiple bead bands that lock onto the wheel. This design is guaranteed **NOT TO SPIN**.

**Natural Rubber Tread Stock**

**Core layer**

**Tough rubber convex base**
