

You bought the bricks that built
this world-class Urology Centre.
Now we need your help to make it
the best it can be.

BUY-A-BRICK

*This new NHS Urology Centre will put
Guildford's Royal Surrey County Hospital
at the forefront of UK prostate cancer care*

Our 'Buy-a-Brick for £10' Appeal has raised an incredible £300,000 enabling us to hit our £2m target. Now we need to ensure the Centre is equipped to match the best in the world.

Please donate to our

'Fabulous Fit-Out' Appeal

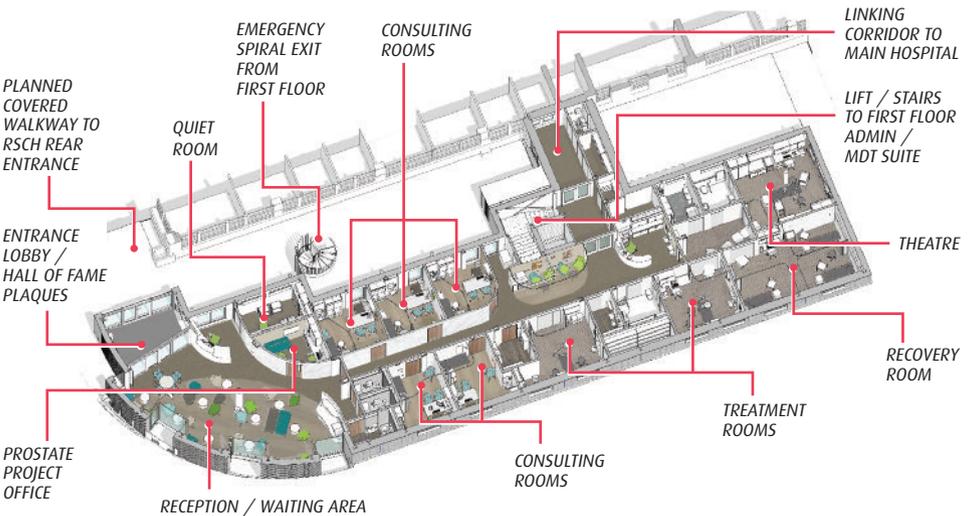

via our leaflets or online at
www.prostate-project.org.uk

To deliver a world-class service,
Royal Surrey clinicians need
advanced equipment that is beyond
the reach of NHS budgets.

*Please help us by donating to the
'Fabulous Fit-Out' Appeal!*

Even in these austere times, Royal Surrey
budgets will of course provide systems and
equipment that will allow the urology team
to deliver a high level service.

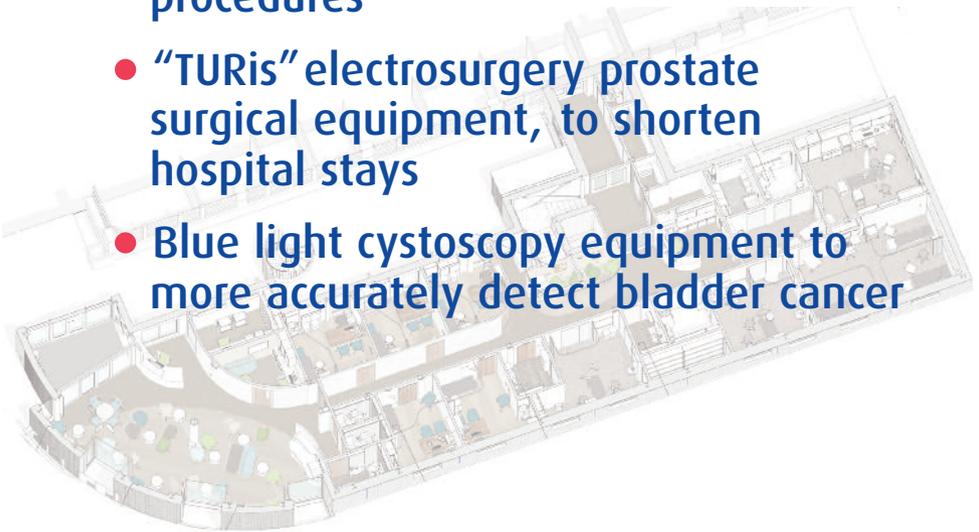

But Centre Director, Professor Stephen Langley,
is seeking more than that. To match the best in
the world, there are a number of specialist items
needed to elevate the Centre's potential.

You can help to make the new Urology Centre among the best in the world – when you donate to the ‘Fabulous Fit-Out’ Appeal!

Specialist equipment needed:

- Specialist prostate ultrasound machines
- MRI-guided targeting device to optimise the accuracy of prostate biopsies
- Specialist patient monitoring equipment to facilitate day case procedures
- “TURis” electrosurgery prostate surgical equipment, to shorten hospital stays
- Blue light cystoscopy equipment to more accurately detect bladder cancer

Prostate Cancer

Facts you need to know

- Early prostate cancer has no symptoms
- Every year 11,000 men die of it – many of them needlessly
- Cure rates when caught early are better than 90%
- Cure rates when caught late are poor. Only 29% survive for 5 years
- Men are twice as likely to get prostate cancer with a family history of the disease. Black men are at higher risk
- Ask your GP for a PSA test now – it is your right* and could save your life

*Men over 50

About our charity

The Prostate Project is a registered, Guildford-based charity established in 1998. We are volunteer-led with no offices or paid staff. Our administration costs are less than 5%. At least 95 pence in every pound you donate to us goes straight to the point of need.

Over the last 20 years we have raised over £8 million. We are dedicated to raising greater awareness of prostate cancer, improving treatment and care for patients and providing support for patients' families and friends.

We support Royal Surrey County Hospital, St Luke's Cancer Centre, Frimley Park Hospital and Professor Hardev Pandha's cancer research team at the University of Surrey.

In 2011, the Royal Surrey asked us if we could raise £1.3 million towards a new Urology Centre. In 2013, they increased that figure to £2 million. Thanks to incredible support and generosity, mostly from the people of Guildford and surrounding areas, we have hit that target and are now fundraising to ensure the new Centre has the equipment and infrastructure to deliver a truly world-class service.

We will always be grateful to the thousands of generous supporters who have made this wonderful new Centre a reality.

giving men a better chance of beating prostate cancer
