

Kingsmere Road and boat launch open - effective officially - Friday, July 28

The **Kingsmere Road and boat launch are open for public access effective Friday, July 28, 2017**. The improvements to the Kingsmere Road and boat launch ensure that visitors have safe and reliable access to the Kingsmere Lake area.

- Raising the roadbed and improving drainage in areas of chronic flooding, as well as stabilising a built-up section of road with high steep ditches, improves driving conditions and makes the road easier to maintain.
- Changes to the Kingsmere River boat launch addresses significant visitor safety concerns and mitigates ecological impact.

Visitors are reminded to park in the gravel parking lot only (not on the vegetated areas or on the paved boat launch).

Visitors may now access the Kingsmere area, **while project construction is ongoing**.

This includes:

- Improvements to the Kingsmere parking area which increases visitor safety and ensures adequate parking to accommodate day use and overnight backcountry users.
- New day use facilities that enhance the visitor experience and make the best use of space created by the construction of the boat launch.

In the fall, when the construction of parking areas and day use facilities is underway, the area will be accessible, **parking capacity may be limited**.

Thank you for your patience and understanding during the facility closures. The improvements to the Grey Owl Trail and Kingsmere Lake area ensure Canadians have the opportunity to access these places for many years to come.
