

12/6/18 NCRTAC Performance Improvement Committee Minutes

Attendees: Sara Steen, Michelle Armstrong, Tara Kolodzik, Gina Brandl

Regional Reports-Available reports were reviewed. Our region is better than the state averages for many of the reports except for the EMS scene time > 20 mins. Discussion around what data points these include. AWH and MMC will look at the data further for analysis. Will ask out of hospital committee to review for potential improvement.

Building on the STAC meeting, we would like to review the following indicators every meeting:

- Mortality
- Time to transfer with ISS >15 and LOS >3 hrs
- Mechanism of injury
- TTA level and ISS

The group reviewed their budget. Nothing has been spent. Discussed opportunities with AIS course and RTTDC. Will try to identify some additional conference speakers to build on our regional PI issues. At STAC St. Lukes had a geriatric MD that was a good presenter.

Will plan on doing regional case reviews at the meetings next year. The hosting site will perform the case review. MMC will present in January.

Respectfully submitted,

Sara Steen

Performance Improvement Committee Chair
