

**SOF<sub>2</sub>O FLO Defender Series Screen Filter**

Filtered Water  
Saves You  
**Money**

**Save**

**System Features:**

- Clear cover allows quick view of collected sediment.
- All Models have cover drain outlet for quick one-step purge cleaning.
- Polyester screen mesh is easily cleaned and reusable eliminating the cost of element replacement.
- High flow rates of 1 to 30 gallons per minute.
- Polyester screen element available in 15-711 micron mesh size to match the condition of the incoming scale and sediment.

**Benefits:**

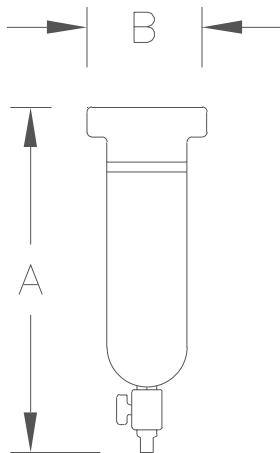

- First line of defense to remove large particles of scale and sediment.
- Stops scale and sediment from clogging pipes, fixtures, water conditioning equipment, and water using appliances.
- Avoids frequent expensive repairs and/or replacement of pipes, fixtures, water conditioning equipment, and water using appliances
- Improves water flow rates throughout the home.
- Helps extend the life of cartridge filters and filter beds in automatic filtering equipment.
