

Plan for Residents leaving the Facility

Following the CDC guidelines:

For now, fully vaccinated people should continue to:

- Take precautions in public like wearing a well-fitted mask and physical distancing
- Wear masks, practice physical distancing, and adhere to other prevention measures when visiting with unvaccinated people who are at increased risk for severe COVID-19 disease or who have an unvaccinated household member who is at increased risk for severe COVID-19 disease
- Wear masks, maintain physical distance, and practice other prevention measures when visiting with unvaccinated people from multiple households.
- Avoid medium- and large-sized in-person gatherings.
- Get tested if experiencing COVID-19 symptoms.
- Follow CDC and health department travel requirements and recommendations.

Vaccinated people visiting with unvaccinated people from a single household that does not have individuals at risk of severe COVID-19

- If the unvaccinated people are from a single household that does not have individuals at risk of severe COVID-19, they can visit with fully vaccinated people indoors, without anyone wearing masks, with a low risk of SARS-CoV-2 transmission. For example, fully vaccinated grandparents can visit indoors with their unvaccinated healthy daughter and her healthy children without wearing masks or physical distancing, provided none of the unvaccinated family members are at risk of severe COVID-19.

Vaccinated people visiting with unvaccinated people from a single household that has individuals at risk of severe COVID-19

- If any of the unvaccinated people or their household members are at increased risk of severe COVID-19, all attendees should take precautions including wearing a well-fitted mask, staying at least 6 feet away from others, and visiting **outdoors** or in a **well-ventilated** space.
- For example, if a fully vaccinated individual visits with an unvaccinated friend who is seventy years old and therefore at risk of severe disease, the visit should

take place outdoors, wearing well-fitted masks, and maintaining physical distance (at least 6 feet).

Vaccinated people visiting with unvaccinated people from multiple households at the same time

- If the unvaccinated people come from multiple households, there is a higher risk of SARS-CoV-2 transmission among them. Therefore, **all people** involved should take precautions including wearing a well-fitted mask, staying at least 6 feet away from others, and visiting outdoors or in a well-ventilated space.
- Continuing the example from above, if fully vaccinated grandparents are visiting with their unvaccinated daughter and her children and the daughter's unvaccinated neighbors also come over, the visit should then take place **outdoors**, wearing well-fitted masks, and maintaining physical distance (at least 6 feet). This is due to the risk the two unvaccinated households pose to one another.

Medium- or large-sized gatherings

- All people, regardless of vaccination status, should adhere to current guidance to avoid medium- or large-sized in-person gatherings and to follow any applicable local guidance restricting the size of gatherings. If they choose to participate, fully vaccinated people should continue to adhere to prevention measures that reduce spread, including wearing a well-fitted mask, maintaining physical distance from others, and washing hands frequently.

Important

- **Please note that no outings to restaurants are accepted during visits with family or friends.**
- For residents leaving the facility less than 24 hours either for medical visits, community outings with family or friends, no quarantine has to be done as long as there is no close contact with any individual that has confirmed COVID-19.
- Residents or family members/friends should let ANTONINE VILLAGE know if any one of them contracts COVID within 14 days of their interaction.
- ANTONINE VILLAGE will consider quarantine for residents leaving the facility, based on an assessment of risk and if uncertainty exists about adherence to guidelines of infection control by the resident or those they were around.
