SINGLE 100-150 KILOTON NUCLEAR STRIKE ON DAMAS

Based on the NükeMap computer model, 1 single detonation of a medium sized 100-150 kiloton warhead dropped on Damascus would cause nearly a 1 million deaths. The entire population is reported to be 1,711,000 people. The detonation of just 1 medium-sized nuclear bomb would kill over 300,000 inhabitants instantaneously. The other 500,000 would die within 1 week due to complications of radiation poisoning, etc. The following are the known conventional methods of delivering a nuclear device aside from a 'dirty bomb' that can be delivered as a 'suitcase nuke' which by the way, some are not accounted for when the former USSR collapsed.

there are approximately ~152,000 people in the 1 psi range of the most recent detonation.

SOME OBSERVATIONS OF THE POSSIBLE END OF DAYS WAR TIMELINE

Perhaps as a mirror or prophetic echo of the 70 years of captivity of the Jews in such lands, the 70-year anniversary of Israel since 1948 will have some sort of prophetic synchronicity in 2018. Until then, many Muslim mercenaries have come from various Muslim enclaves of the Islamic World to fight in Syria. In effect, the downing of a 'high-tech' Israeli jet has given the Muslim factions courage and newfound resolve to sustain and escalate the fight against Israel. On one hand, the Russians showed-off their technology and on the other, the Syrians were satisfied with their investments. More so, now that the USA has officially proclaimed that Jerusalem is Israel's capital and off the table in any Palestinians negotiations, the only option is eventual war against Islam. It is not a matter of if but when. As Israel has reached its 70th year anniversary in 2018, it could also coincide with its reaching 'maturity' as a 'Super Power' as well. The point is that all such 'Super Powers' have made a nuclear detonation to prove it as an 'initiation' into the Nuclear Club. etc.

Since the Yom Kippur War of 1973, Israel's nuclear deterrent has been that of the Sampson Option. This requires a rationale in that such a decision and act would have to come from the last resort pertaining to its sense of imminent annihilation. This 'option' is basically 'Mutually Assured Destruction' is one in which, if Israel gets 'nuked' so will its instigators. Has Israel had a credible threat of nuclear annihilation? Yes, In 1982, Israel bombed the French made nuclear reactor outside Bagdad that Saddam Hussein ordered built. The Israeli Mossad uncovered publications that the Iragis wanted to 'neutralize Israel'. In fact Saddam named the reactor Tammuz for the month in which King Nebuchadnezzar started to destroy Israel

On February 10, 2018, 'open war' with Iran has now occurred for the first time since Persian Empire was ruled by Darius and Xerxes. Persia has historical dealings with Judah or Israel in this case, which is the last tribe of Judah, Ironically, ancient Persia has had one of the stronger dealings with the Jews throughout history.

It could be the case that either some Iranian elements and/or other Muslim paramilitary fronts could be planning to use such a nuclear devise against Israel. Also, all the chemical stockpiles that are purported to be there would be also taken out. On another level, the Israeli nuclear detonation in Damascus would also serve to put Russia. Iran and Turkey at bay to secure their survival. Such a detonation would broadcast to the Muslim 'ocean' of adherents that Israel means business and will not tolerate and threat of extension ever again. It will serve to 'scare' Israel's enemies from ever attacking again. What is rather interesting is that for the first time since 1948, the additional nation of Iran is one that is now directly involved in the confrontation

THE BURDEN OF DAMASCUS ISAIAH 17 PROPHETIC DESOLATION OF DAMAS

The shooting down of the F-16D on February 10, 2018 by the Russian built *Surface to Air Missile* SAM S-200 VEGA was and is seen as a triumph in the Muslim world in that the 'mighty' technological and superior Israeli war-machine can be taken down. This event is very singular in that it has escalated the war in Syria wherein Israel is now in open conflict with Iran as a USA-copied Iranian drone was shot down over Israeli territory.

This study postulates that the ever-escalating events directly being provoked by Iran against Israel will lead to the nuclear detonation of one of Israel's nuclear devises upon the city of Damascus. Also, according to research, the ancient city of Damascus is known to be the oldest continuous inhabited city on the planet. Biblical prophecy of Isaiah 17 records a coming time period, yet in the future where Damascus would and will cease to be then inhabited, 'desolated' and its 'terror' no long in the morning. What could cause this dramatic proclamation to be fulfilled? A nuclear detonation scenario. Many sceptics of this theory would point out that presently, the city of Damascus is now virtually 'desolate' or in ruins from all the fighting caused by the years of civil war.

Not only is Damascus on the verge of collapse but virtually every other major city such as Homs, Palmyra, lies in ruin etc. There are many videos that do show the devastation and 'desolation' that has left such cities as Damascus as a wasteland. Its people, millions upon millions have died or fled to neighboring nations and Europe.

The purpose of this illustration it to consider some variables and possible prophetic sequences based off of the 'Burden of Damascus' as depicted in Isaiah 17. Many *End-Times* researchers believe that the destruction of Damascus is about to be fulfilled.

Return of Jesus

Jerusalem

The possible timeline will have the *Psalm 83 War* that will ratify the 'Covenant with the Many', instill a false 'Peace and Safety' for Israel. Then the *Gog-Magog War* will perhaps occur in the midpoint of the *Tribulation Period* to coincide with the false Messiah coming-out and stopping the *Daily Sacrifices* and causing the *Abomination of Desolations* in the 3rd Temple. It will be at this time that many in Israel will see the hand of the LORD YHVH defend Israel on their behalf and many Jews will start to turn towards YHVH and not their false Messiah. The following 1260 days will be the *Time of Jacob's Trouble* that will culminated in the return of Jesus with the conclusion of the *Battle of Armageddon*.

SPIRIT OF HAMAN

The same Spirit of Haman that sought to destroy the earthly People of YHVH has risen up again in these Last Days to attempt such a task. The modern counterpart of Haman, Iran's leaders likewise publically announce the need to impose a national genocide upon Israel. The current Shia eschatology demands such a scenario in order to usher in their Islamic New World Order.

The rhetoric used by the Muslim clerics and the Iranian President to eradicate the Zionist 'menace' is taken quite literally by the Israeli leadership, they have to. What is different in allowing Iran to possess a nuclear armory is that it is a pre-requisite tool pledged to be implemented in order to unleashing of the advent of their 'Messiah' -the Madhi.

NUKEMAP 2.42 : FAQ

Drag the marker to wherever you'd like to target.

Tel Aviv + Haifa + Jerusalem, Israel

Enter a yield (in kilotons): 50000

'Ivan Bomba' - largest USSR bomb designed (50 MT)

Total initial estimated fatalities:

5,460,540 Total Estimated injuries:

2,953,950

In any given 24-hour period, there are approximately ~13,000,000 people in the 1 psi range of the most recent detonation.

Effects radii for 100 megaton airburst* (smallest to largest):

Radiation radius (500 rem): 6.99 km (153 km²)

500 rem radiation dose; without medical treatment, there can be expected between 50% and 90% mortality from acute effects alone. Dying takes between several hours and several weeks.

Fireball radius: 7.92 km (197 km²)

Maximum size of the nuclear fireball; relevance to lived effects depends on height of detonation. If it touches the ground, the amount of radioactive fallout is significantly increased.

Air blast radius (20 psi): 10.1 km (321 km²)

At 20 psi overpressure, heavily built concrete buildings are severely damaged or demolished; fatalities approach 100%.

Air blast radius (5 psi): 21.2 km (1,420 km²)

At 5 psi overpressure, most residential buildings collapse, injuries are universal, fatalities are widespread.

Radiation radius (3rd degree burns): 64.2 km (12,960 km²)

Third degree burns extend throughout the layers of skin, and are often painless because they destroy the pain nerves. They can cause severe scarring or disablement, and can require amputation. 100% probability for 3rd degree burns at this yield is 13.9 cal/cm2.

Estimated total-dose fallout contours for a 100 megaton surface burst (52% fission) with a 15 mph wind.

Created by Alex Wellerstein, 2012-2017.
