

Advanced Coatings for Ruggedised Display applications

Applications:

- Environmental ruggedisation of LCD panel displays.
- Readability enhancement in high ambient light.
- EMI shielding with optimum brightness.
- Transparent-conductive heater coatings.

Durable AR:

High durability AR coated glass panel, developed for ruggedised display applications.

- Resistant to impact & abrasion
- Water and Salt-Fog Environments
- Low Specular Reflection
- Can be laminated to LCD panels

Conductive Coatings:

Optically matched conductive coatings, for EMI shielding & panel heating applications.

- Resistivity to below 10 Ohm/sqr
- High clarity EMI shielding
- Efficient alternative to mesh filters
- Optically matched for lamination
