PRESENTATION GUIDELINES

DEAR COSMET MEMBERS,

The best presentations and programs are those made by you, the COSMET members. COSMET works best when we present our information about repairs, accidents, procedures, and improvements.

Presentations do not have to be elaborate or fancy. A few slides or overhead transparencies about a topic are usually the best presentations.

Keep a camera handy and take pictures the next time you have a repair or make an improvement. There is always time at the meeting for a presentation.

If you know a vendor or service that may be of interest to the members, contact the program chairman.

Remember, what is important to you is important to COSMET and the members.

Please help us; we want your ideas and suggestions.

Contact the program chairman to schedule a presentation. If you do not want to schedule a time, bring your slides, overheads, or hand drawn sketches for general discussion.

We also need host companies that can host a COSMET meeting at your property, the cost is minimal. Contact the Program Chairman.

If you have a presentation to give please fill out the technical data sheet and give to the secretary at the COSMET meeting.

THANK YOU

COSMET President
