

ACE 2020 BUILD NOTES

Missing notes for Builds A.1 and A.2. These versions incorporated changes to code to make ACE compatible with both 32 and 64 bit versions of Access. These versions also incorporated the revisions necessary to avoid the November 2019 Access bug relating to update queries.

Build A.4.1 – 1/27/20

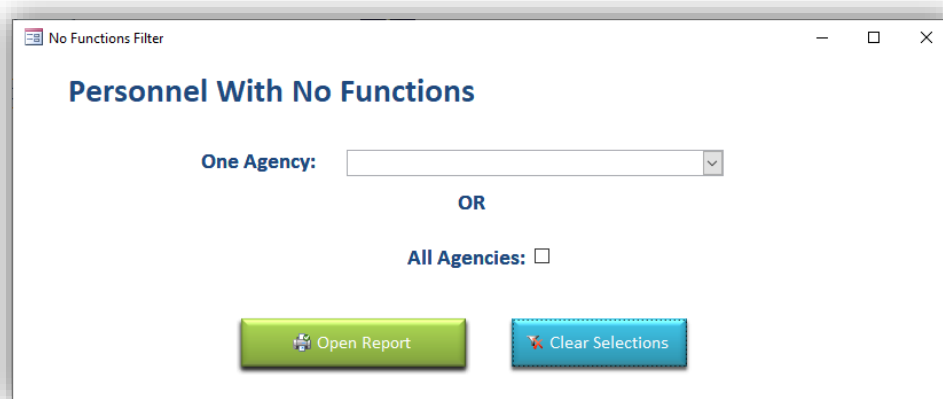

- Memorandum of Transmittal
 - Increased size of date fields.

Build A.4 – Released 01/24/20

- Report rptNoFunctions.
 - Needed to revise the underlying queries as the test database was small but the query was too large to execute on larger databases. The new query is more effective and faster.

Build A.3

- Report rptNoFunctions created.
- Form frmNoFunctions filter created.

- Added the new report to the menu.
