

The Children's Corner Preschool Pre-Kindergarten Extended Day Program

The Pre-Kindergarten program offers Extended Day options that allow children to bring their lunch to school and have an afternoon of enriching activities. Extended days meet on Monday and Wednesday from 11:30-2:00 P.M. Children can attend one or both days. If only one day is chosen then that choice of day is Monday. All children can choose to stay on Monday; however, on Wednesday the total enrollment allowed is 24 children. The program is divided into three 9 week sessions: **Fine Arts, Science, and Physical Fitness**. The schedule of the Extended Day is much like that of the regular program in that there is a readiness activity, craft, and play time. The lessons that are taught are topics that are not presented in the regular curriculum. A variety of teaching methods are used to present these topics. In each of the 3 sessions there may be a field trip and or a guest presenter. Listed below are examples of the topics that are taught in each session.
